About Pew Research Center

Pew Research Center is a nonpartisan fact tank that informs the public about the issues, attitudes and trends shaping America and the world. It does not take policy positions. The Center conducts public opinion polling, demographic research, content analysis and other data-driven social science research. It studies U.S. politics and policy; journalism and media; internet, science and technology; religion and public life; Hispanic trends; global attitudes and trends; and U.S. social and demographic trends. All of the Center's reports are available at www.pewresearch.org. Pew Research Center is a subsidiary of The Pew Charitable Trusts, its primary funder.

Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable

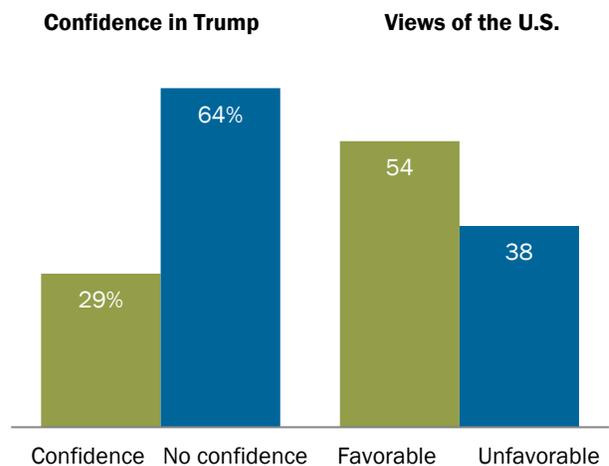

Trump foreign policies receive little support

As has been the case throughout his presidency, U.S. President Donald Trump receives largely negative reviews from publics around the world. Across 32 countries surveyed by Pew Research Center, a median of 64% say they do not have confidence in Trump to do the right thing in world affairs, while just 29% express confidence in the American leader.

Anti-Trump sentiments are especially common in Western Europe: Roughly three-in-four or more lack confidence in Trump in Germany, Sweden, France, Spain and the Netherlands. He also gets especially poor reviews in Mexico, where 89% do not have confidence in him.

In nearly all nations where trends are available, Trump receives lower ratings than his predecessor, Barack Obama. [As reported by the Center in 2017](#), international confidence in the U.S. president plummeted after Trump's inauguration, while favorable ratings for the United States also declined.

Publics around world express little confidence in Trump but maintain relatively favorable views of the U.S.

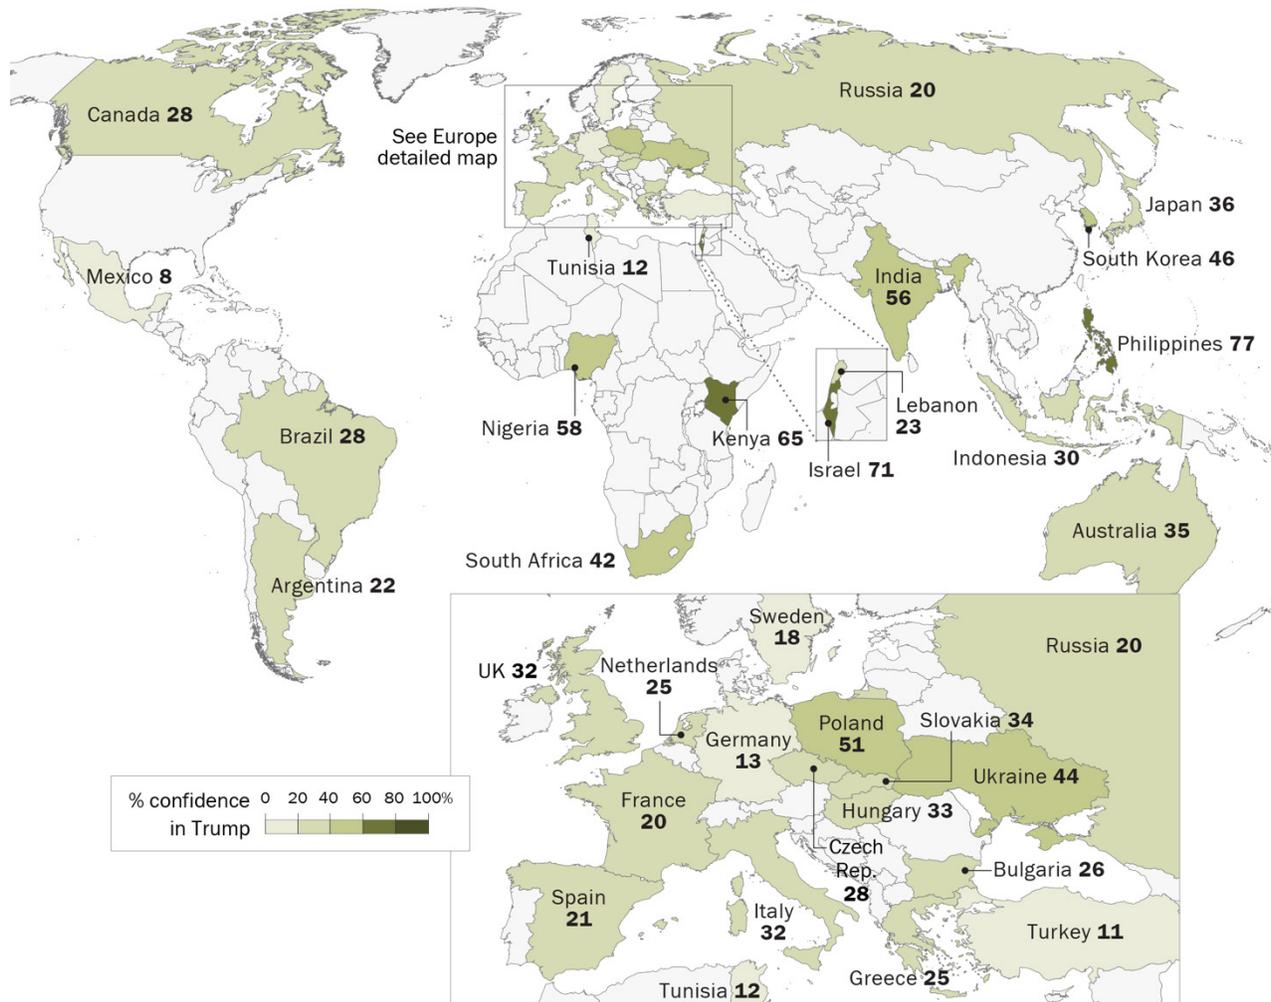

Note: Percentages for confidence in Trump are medians based on 32 countries. Lithuania was excluded due to a processing error. Percentages for views of the U.S. are medians based on 33 countries. Don't know responses not shown.

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

The current survey finds an uptick in some countries since 2018 in ratings for President Trump and the U.S., though the degree of change varies from modest to solidly positive. At least two plausible factors may be behind these shifts. First, support for Trump has increased somewhat on the ideological right in many nations. Second, some of the changes could be influenced by modifications in how the 2019 survey was administered (see sidebar below).

How much of a shift in attitudes toward the U.S. and its president?

Pew Research Center has tracked global opinion of the United States since 2002. Over that period, we have seen substantial changes in attitudes toward the U.S., especially following the election of a new president. The first occurred when Barack Obama replaced George W. Bush: Favorability ratings of America in Europe and in many other countries soared. The opposite scenario occurred when Donald Trump assumed the duties of president: Favorable opinion of the U.S. plummeted in numerous countries, again particularly in Europe.

In years with no change of U.S. president, the Center has also observed shifts in foreign attitudes toward the U.S. and its leader. Sometimes these shifts are connected to U.S. policy or actions, as in the case of the Iraq War in 2003; sometimes they reflect domestic realities, such as the case of right-wing voters in Europe recently growing more favorable toward the U.S.

Sometimes administrative procedures may also influence how respondents answer questions. In accordance with the European Union's new General Data Protection Regulation, the current survey's introductory language placed increased emphasis on the fact that Pew Research Center is based in the U.S. and that survey results would be sent to the U.S. for analysis.

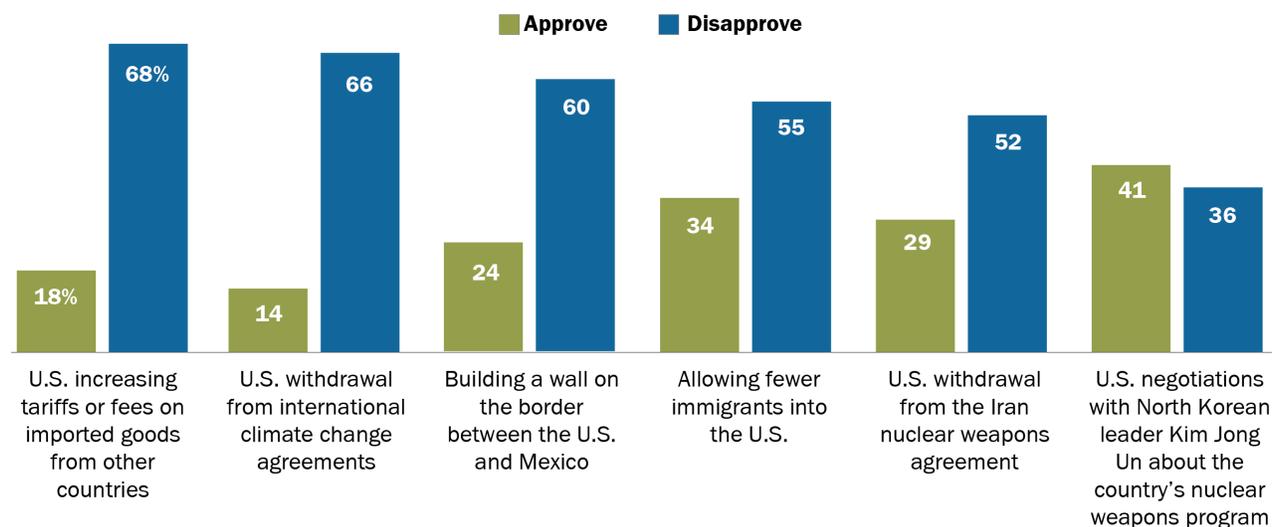

Highlighting the American sponsorship of the survey may have encouraged some respondents to answer more favorably when confronted with questions about the U.S. and its president or policies. We cannot say for certain how widespread or significant this effect may have been, but its plausibility leads us to exercise caution when stating the degree of change in European attitudes toward the U.S.

This past year also saw a change in the company that coordinates the survey, as well as many of the in-country polling firms responsible for fieldwork. While instructions to firms and interviewers were consistent with previous years, "house effects" associated with the new fieldwork force may have introduced a degree of "noise" into precise year-over-year comparisons between our 2018 and 2019 survey results.

Again, on balance, foreign publics lack confidence in Trump to do the right thing when it comes to world affairs. The survey, conducted in spring and summer 2019, finds that the lack of confidence in the 45th U.S. president is driven in part by opposition to his policies. A median of 68% across the nations polled say they disapprove of the U.S. increasing tariffs on imported goods; a median of 66% oppose the Trump administration's withdrawal from international climate agreements; and 60% disapprove of Trump's proposal to build a wall on the border with Mexico.

Many of Trump's major policies are unpopular globally

% who ___ of each policy of U.S. President Donald Trump

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

Most also dislike the current administration's tighter restrictions on immigration and its withdrawal from the Iran nuclear weapons agreement.¹

Trump's approach to North Korea is the only policy position tested that is viewed favorably on balance, with a median of 41% saying they approve and 36% disapproving.

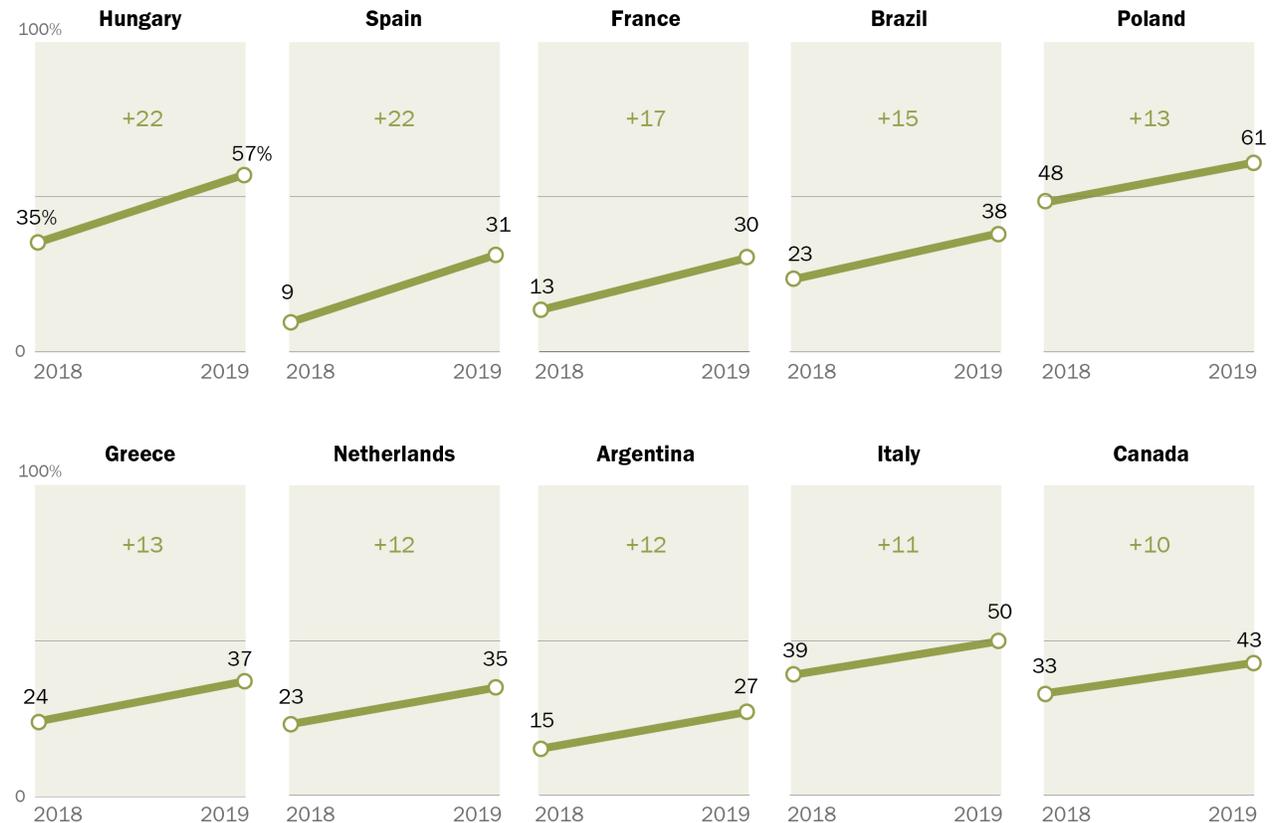

Still, Trump does find pockets of support. There are six nations where roughly half or more voice confidence in his handling of world affairs. About seven-in-ten have confidence in Trump in Israel, where 74% endorse his decision to move the U.S. Embassy from Tel Aviv to Jerusalem and 66%

¹ The survey was conducted prior to the Jan. 3, 2020, U.S. missile strike that killed Iranian Gen. Qassem Soleimani.

back his withdrawal from the Iran nuclear deal. In Ukraine, just under half (46%) rate the U.S. president positively.²

On the ideological right, confidence in Trump has increased in many nations

% of people on the *ideological right* who have confidence in U.S. President Donald Trump to do the right thing regarding world affairs

Note: Only statistically significant changes shown.

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

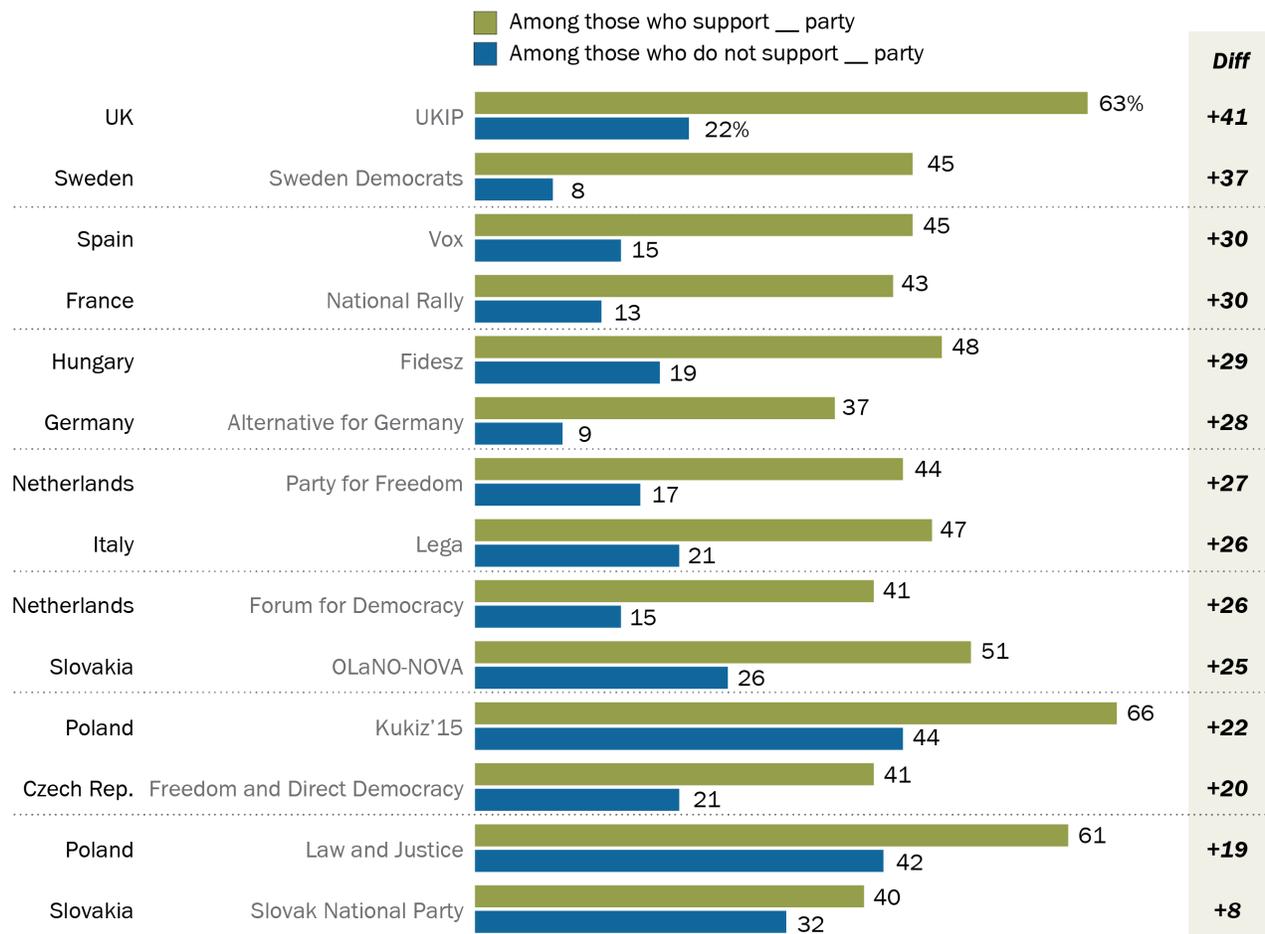

And Trump is generally more popular among people on the political right. In 18 nations, those who place themselves on the right side of the ideological spectrum express more confidence in the U.S. president. For example, more than eight-in-ten Israelis on the ideological right have confidence in Trump, compared with just 37% of those on the left. Only 14% of Australians from the left give Trump positive marks, compared with a 55% majority among people from the right.

² The survey was conducted in Ukraine prior to revelations regarding President Trump's July 25, 2019, phone call with Ukrainian President Volodymyr Zelensky.

And a significant gap between right and left exists in 12 of the 14 European Union nations polled. Yet even among respondents on the right, confidence in Trump rises to 50% or higher in only six nations.

Greater confidence in Trump among European right-wing populist party supporters

% who have confidence in U.S. President Donald Trump to do the right thing regarding world affairs ...

Note: Only statistically significant differences shown. "Support" percentages represent respondents who have a favorable view of each party. "Do not support" percentages represent respondents who have an unfavorable view of each party. For more information on European populist parties, see Appendix.

UKIP was the largest UK party in the European Parliament prior to the 2019 elections. Many supporters and elected officials left to join the new Brexit Party in early 2019. The survey was fielded around the time the new party emerged and does not include a measure of attitudes toward the Brexit Party.

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

Positive ratings for Trump have increased significantly since 2018 among those on the right in several nations. Confidence in Trump from the right is up 15 percentage points or more in Hungary, Spain, France and Brazil, and it has increased by at least 10 points in an additional six nations.

Trump gets somewhat higher marks among people who express positive views of right-wing populist European political parties. For example, in France, among those with a favorable opinion of Marine Le Pen's National Rally (formerly National Front), 43% have confidence in Trump, compared with only 13% among people with an unfavorable view of National Rally.

Supporters of right-wing populist parties are also more likely to endorse Trump's key policies. For instance, 67% of people who have a positive view of National Rally support Trump's immigration policy, but just 22% say the same among those who dislike National Rally. There is a 40 percentage point gap on this question between supporters and nonsupporters of Alternative for Germany and the Sweden Democrats. Similar significant gaps between those who like and those who do not like right-wing populist parties exist in Poland, the Netherlands, UK, Italy, Spain, the Czech Republic and Hungary. Still, even among those with favorable views of these parties, support for Trump's policies is limited.

The survey asked all respondents about four international leaders in addition to President Trump: German Chancellor Angela Merkel, French President Emmanuel Macron, Russian President Vladimir Putin and Chinese President Xi Jinping. Trump receives the highest negative ratings among the five leaders, though ratings for Putin and Xi are also on balance negative.

Across the 33 countries surveyed a median of 54% express a favorable opinion of the United States, while 38% have an unfavorable one. Favorable opinion of the U.S. declined dramatically when Trump took office and remains significantly lower than during the Obama era.

These are among the major findings from a Pew Research Center survey conducted among 36,923 people in 33 countries from May 18 to Oct. 2, 2019.

More negative ratings for Trump than for other world leaders

German Chancellor Angela Merkel receives the highest marks among the five leaders tested on the poll: A median of 46% express confidence in her leadership of world affairs, while 29% say they do not have confidence in the long-serving German leader. Views of Merkel vary widely [within Europe](#). While roughly seven-in-ten or more have confidence in her in Sweden, the Netherlands, France, the UK, Germany and Spain, only 28% of Hungarians, 25% of Czechs and 22% of Greeks say the same.

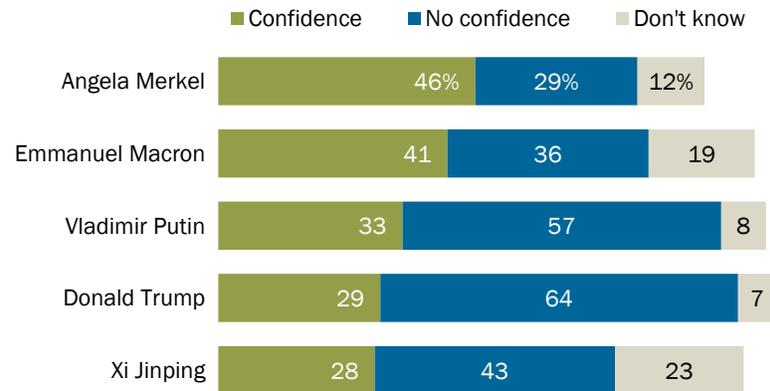

By a slim margin, French

President Macron receives more positive reviews (a median of 41% have confidence in him) than negative ones (a median of 36% lack confidence). Within Europe, the share of the public expressing confidence in the French leader ranges from 73% in Germany to 18% in Hungary.

Relatively few express confidence in Russian President Putin or Chinese President Xi. And U.S. President Trump receives more negative ratings than either the Russian or Chinese leader.

Trump receives most negative marks among five world leaders

% who have ___ in each leader to do the right thing regarding world affairs

Note: Lithuania was excluded from confidence in the Donald Trump calculation due to a processing error. Percentages for confidence in Donald Trump are medians based on 32 countries. All other percentages are medians based on 33 countries.

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

Ratings for U.S. mostly favorable, though low among some key allies

While overall attitudes toward the United States are favorable, there are large differences across the 33 nations in the study, especially among some of its key European Union allies. It receives its most positive reviews in the region from three Central and Eastern European nations: 79% of Poles, 70% of Lithuanians and 66% of Hungarians have a favorable opinion of the U.S.

Meanwhile, Europe's lowest ratings for the U.S. are in the Netherlands (46% favorable), Sweden (45%) and Germany (39%). Outside of the EU, ratings for the U.S. are much more positive in Ukraine (73% favorable) than in Russia (29%).

As has been the case over time in Pew Research Center surveys, most in the sub-Saharan African nations polled express favorable opinions of the U.S. Views in Asia are also mostly positive, though 45% in U.S. ally Australia currently give the U.S. an unfavorable rating.

Israelis give the U.S. its highest rating on the survey (83% favorable). But while 94% of Israeli Jews see the U.S. positively, just 37% of Israeli Arabs agree. Elsewhere in the Middle East and North Africa, attitudes are more negative. This is especially the case in Turkey, where just one-in-five have a favorable opinion of the U.S., the lowest percentage registered in the survey.

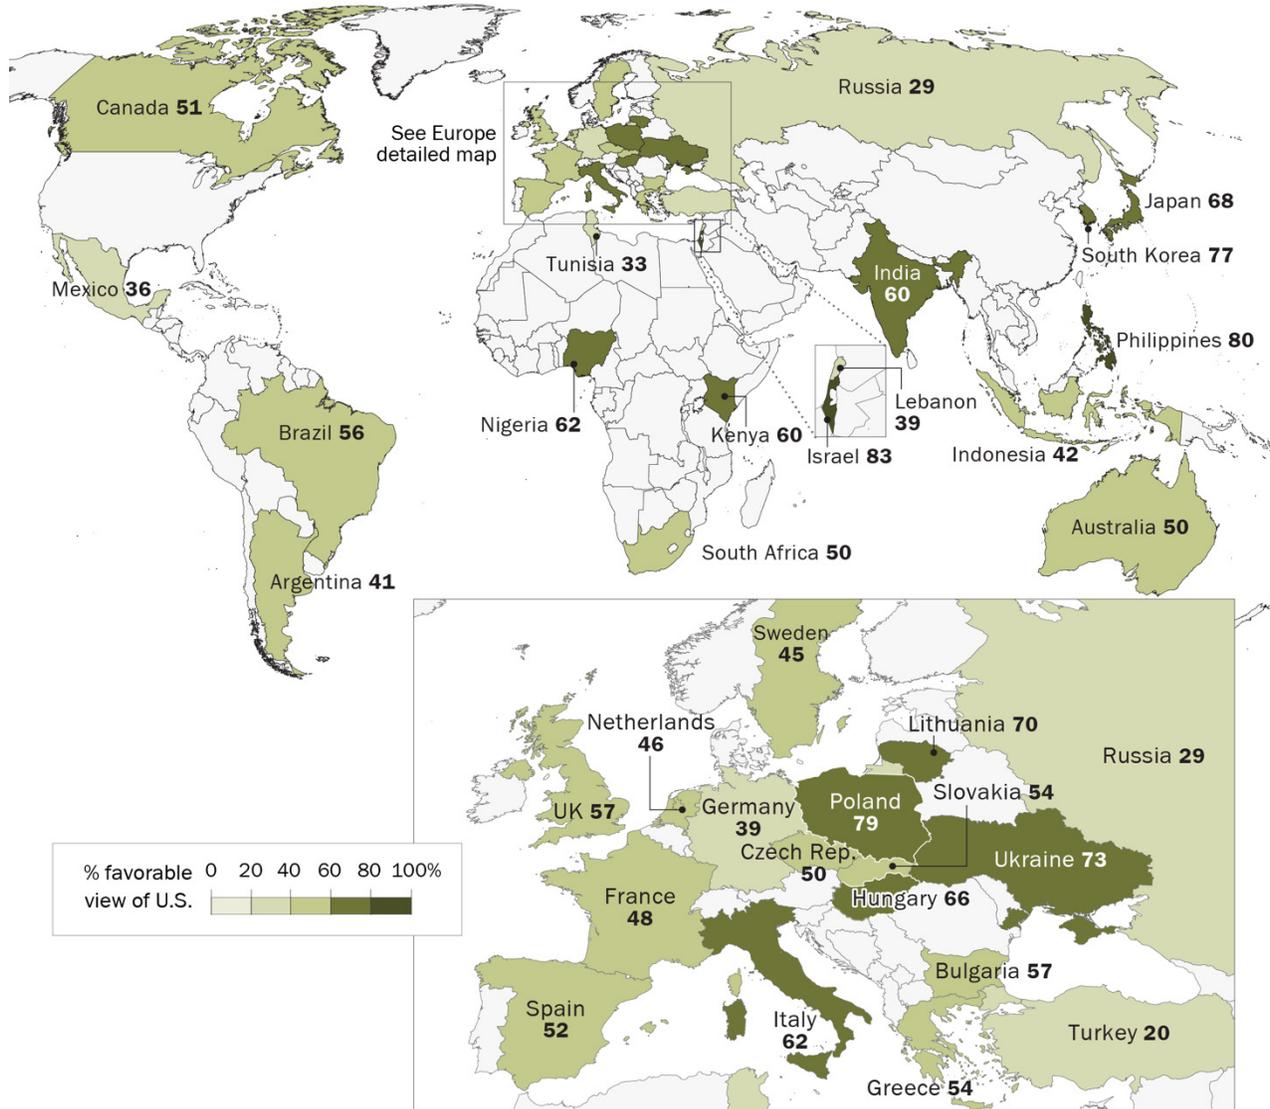

Views of the U.S. are mostly negative in Mexico, where just 36% give the U.S. a favorable rating, only 8% have confidence in Trump and fully 90% oppose the building of a wall on their country's border with the U.S.

In many countries, there was no major change in U.S. favorability between 2018 and 2019, but 10 nations did see significant increases in the share of people with favorable views of the U.S. Most of these countries are in Europe. This nascent trend may be driven at least in part by increased favorability among supporters of right-wing populist groups in some nations, but it may also be related to changes in survey administration in the past year (see sidebar).

In five of the eight European countries where U.S. image has improved between 2018 and 2019 – France, Germany, Greece, Netherlands and Spain – there were significant increases in favorable views of the U.S. among people on the right of the ideological spectrum. For instance, 67% of Greeks who say they are on the right ideologically have a favorable opinion of the U.S., while just 40% held that view in 2018.

U.S. image generally favorable globally, but some exceptions

% who have a favorable opinion of the U.S.

 "Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

How we did this

This analysis focuses on understanding the international image of the United States and worldwide confidence in U.S. President Donald Trump and approval of his signature foreign policies. Pew Research Center has been tracking [views of the U.S.](#) and [confidence in the U.S. president](#) over the past 20 years. The report also includes trend comparisons of confidence in Trump to his predecessors (Barack Obama and George W. Bush) as well as other current world leaders (Angela Merkel, Emmanuel Macron, Vladimir Putin and Xi Jinping).

For this report, we used data from a survey conducted across 33 countries from May 18 to Oct. 2, 2019, totaling 36,923 respondents. The surveys were conducted face-to-face across Africa, Latin America, the Middle East and South Asia and on the phone in North America and the Asia-Pacific. Across Europe, the survey was conducted over the phone in France, Germany, the Netherlands, Spain, Sweden and the UK, but face-to-face in Central and Eastern Europe, Italy, Ukraine and Russia. U.S. data and analysis are excluded from this report.

Here are the [questions](#) used for the report, along with responses, and its [methodology](#).

1. Little trust in Trump’s handling of international affairs

Ratings for U.S. President Donald Trump’s handling of world affairs are largely negative around the world, and opinions on this matter have remained relatively stable since he took office in 2017.

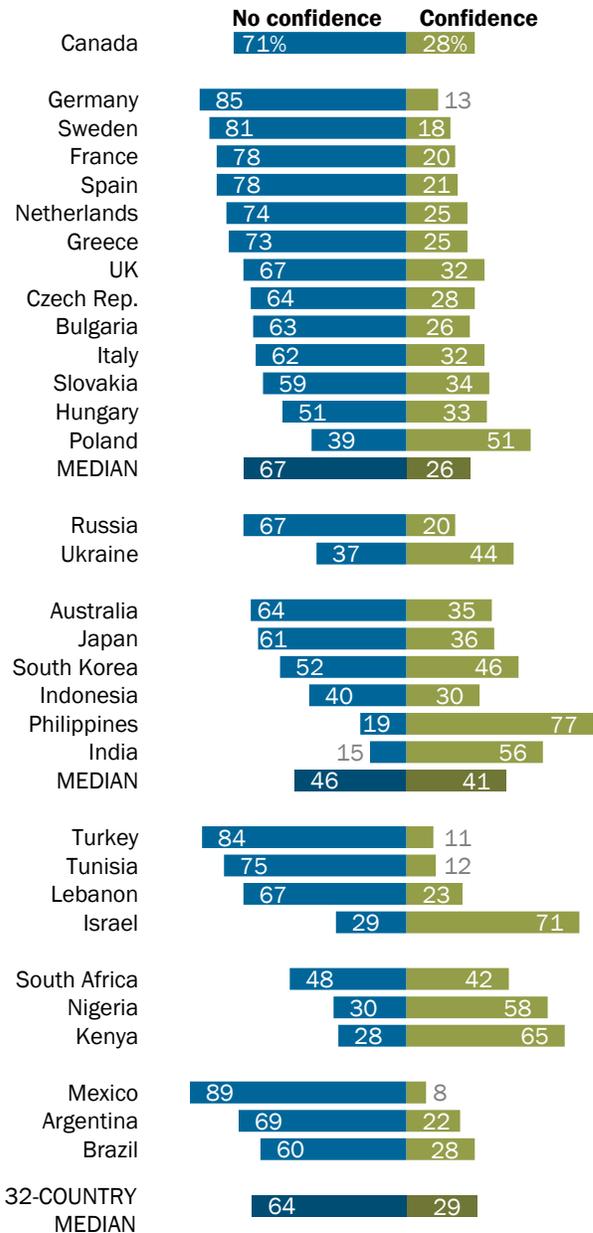

A median of 29% across 32 countries surveyed express confidence in Trump to do the right thing in world affairs. As in previous years of his presidency, trust is lowest in Mexico. Argentines and Brazilians generally lack confidence in the president as well, though both countries have seen a roughly 10 percentage point increase in the share holding this opinion since 2018.

Confidence in the U.S. president is also low in every European country surveyed except one: Roughly half of Poles have faith in Trump to do what is right in international affairs. Poland is also the only European country of those consistently surveyed in the past three years to show an increase in confidence each year. In 2017, only 23% of Poles viewed Trump positively. (Polish President Andrzej Duda visited the U.S. in early June of 2019, while the survey was in the field, and the two leaders announced a plan to [strengthen the military relationship](#) between their countries.)

Perceptions of Trump are more positive in general in the Asia-Pacific, the Middle East and Africa compared with Europe, though opinions

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

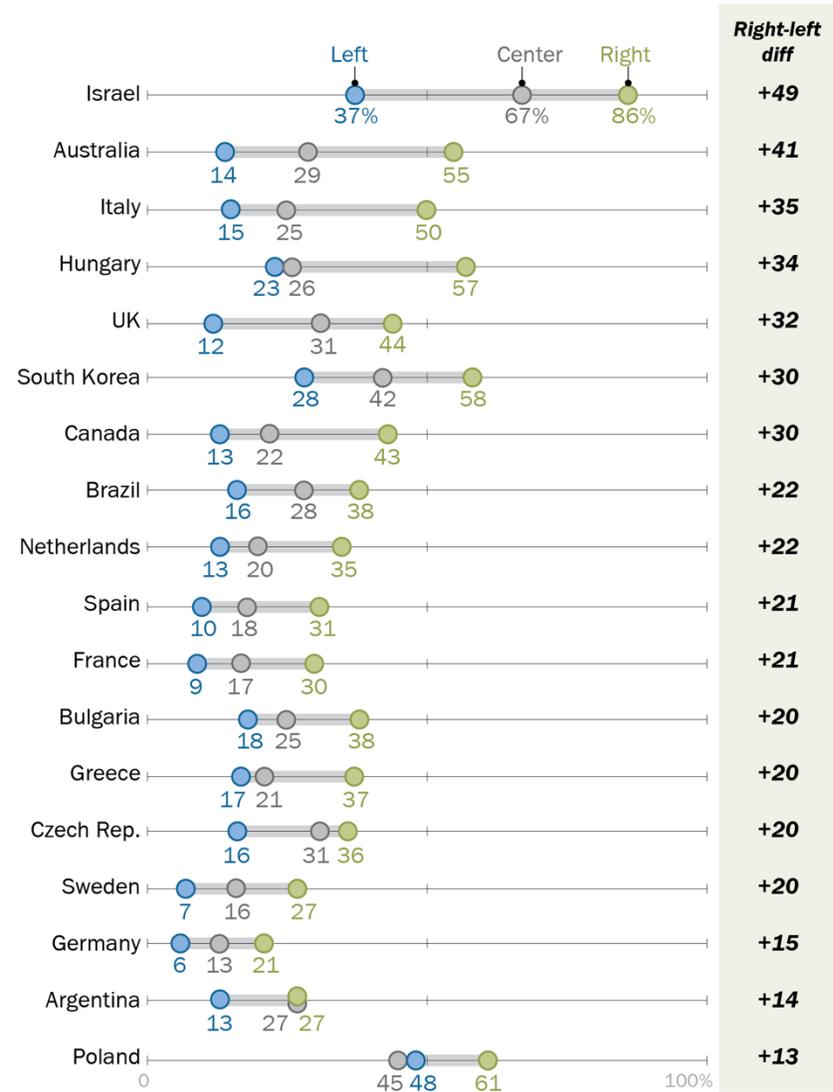

few in Japan, Australia, Lebanon, Tunisia and Turkey share this view.

Views of Trump vary by age in several of the countries surveyed, but the difference is not always in the same direction. In Australia and the Western European countries of the UK, Greece, France and Germany, adults ages 50 and older are more likely than younger adults to see Trump in a positive light. In contrast, younger adults have more confidence in the president than older adults in Slovakia, Bulgaria and Russia.

In 12 countries, men are more likely than women to rate Trump positively. For example, 28% of men in Sweden have confidence in the president, compared with only 8% of women. Significant gender differences can also be found in Brazil, Australia, Japan, the UK, Canada, the Netherlands, Argentina, Spain, South Korea, France and Germany. In Tunisia, women (15%) are more likely than men (9%) to trust Trump.

Those on the right of the ideological spectrum are more confident in Trump

% who have confidence in U.S. President Donald Trump to do the right thing regarding world affairs

Note: Only statistically significant differences shown.
 Source: Spring 2019 Global Attitudes Survey. Q38a.
 "Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

Self-placement on the ideological spectrum is also associated with views of Trump in nearly every country where ideology was measured. Those on the right are much more likely than those on the left to trust Trump’s handling of international affairs.

In some countries, this ideological divide is particularly sharp. For example, there is an almost 50 percentage point difference between those on the right in Israel – most of whom have faith in the U.S. president – and those on the left. Differences of 20 points or more can also be seen in most of the European countries surveyed, as well as Australia, South Korea and Brazil.

In several countries, people who place themselves on the right of the ideological spectrum have gained confidence in Trump since 2018.

Hungarians on the political right have shown the largest increase in trust. In 2018, only around a third of those on the right in Hungary had confidence in the U.S. president. In 2019, a majority in this group believe Trump would do the right thing in international affairs.

A similar pattern can be seen in many European countries, including Spain, France, Poland, Greece, the Netherlands and Italy. Confidence in Trump has also increased among Brazilians, Argentines and Canadians on the right of the political spectrum. Confidence has remained largely the same since 2018 among people on the left in most countries.

Confidence in Trump increased among those on ideological right

% of people on the ideological right who have confidence in U.S. President Donald Trump to do the right thing regarding world affairs

“Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable”

PEW RESEARCH CENTER

Consistent with broader ideological differences, people who hold a favorable view of right-wing populist parties in Europe are more likely than those with an unfavorable view to give Trump positive ratings.

Those with differing views of UKIP in the UK deviate the most in their views of Trump.³ More than three-in-five UKIP backers express confidence in the U.S. president, compared with roughly one-in-five among those who have a negative view of the party. Similarly, people with favorable views of Sweden Democrats, Vox in Spain, National Rally in France and Alternative for Germany (AfD) are at least three times as likely as others to trust Trump.

In contrast, attitudes toward center or left-wing populist parties are not associated with views of Trump. The exception is among those with differing opinions of ANO 2011 in the Czech Republic, a party that generally falls in the center politically. People who view ANO 2011 positively (34%) are significantly more likely than those with a negative view of the party (22%) to trust Trump in international affairs.

Greater confidence in Trump among supporters of right-wing populist parties

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

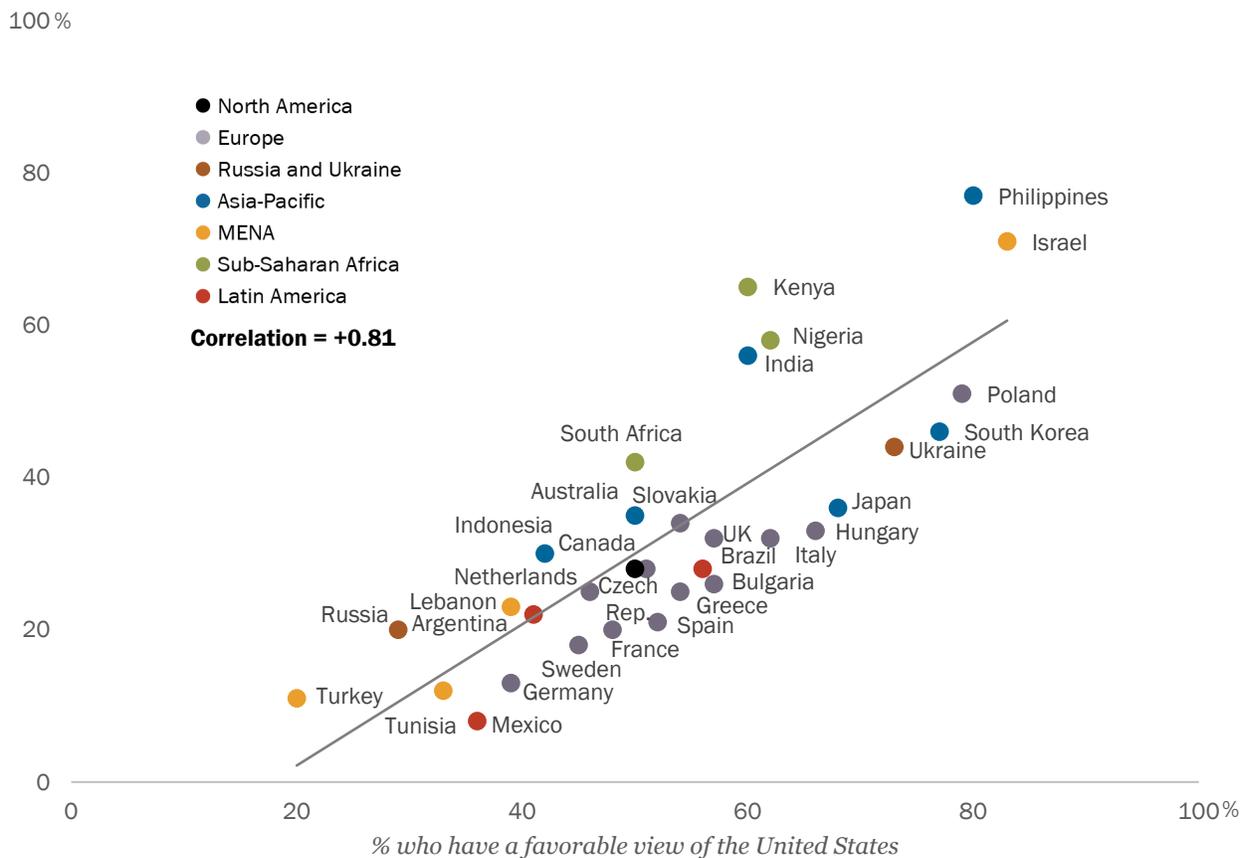

PEW RESEARCH CENTER

³ UKIP was the largest UK party in the European Parliament prior to the 2019 elections. Many supporters and elected officials left to join the new [Brexit Party](#) in early 2019. The survey was fielded around the time the new party emerged and does not include a measure of attitudes toward the Brexit Party.

Views of the U.S. president are closely linked to attitudes toward the United States as a whole, both at an individual level and across countries. In nearly every country surveyed, people with a favorable view of the U.S. are more likely than those with an unfavorable view to have confidence in the U.S. president. Similarly, countries with a higher share who view the U.S. positively tend to have more people who trust the president to do what is right in foreign affairs. For example, the two countries with the most confidence in Trump – Israel and the Philippines – are also among the most favorable toward the U.S.

Greater confidence in Trump in countries with more positive views of the U.S.

% who have confidence in U.S. President Donald Trump to do the right thing regarding world affairs

 "Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

In comparison with their views of President Trump, publics generally express more confidence in German Chancellor Angela Merkel, French President Emmanuel Macron and Russian President Vladimir Putin. Similar percentages express confidence in Trump and Chinese President Xi Jinping, but Trump receives higher no confidence ratings and Xi is less well-known internationally.

Across the countries surveyed, many believe Merkel would do the right thing in world affairs (median of 46%). Majorities in 13 countries express confidence in the German chancellor, including 86% in Sweden, 82% in the Netherlands and 74% in both Germany and France. Publics in some other European countries hold much less positive views of Merkel, however. Only around a quarter in the Czech Republic and Greece trust her, some of the lowest shares in the survey.

[As is the case with Merkel](#), confidence in Macron is highest in Germany, the Netherlands and Sweden. Fewer people in Macron's home country of France say they trust their leader's handling of world affairs (48%).

Putin garners the most positive reviews from Russians; 73% are confident that their leader would do what is right in world affairs. Roughly half or more in Bulgaria, the Philippines, Greece and Slovakia agree. Yet few in other countries express trust in the Russian leader. Only 15% in Poland and just 11% in Ukraine have confidence in Putin's approach to international affairs.

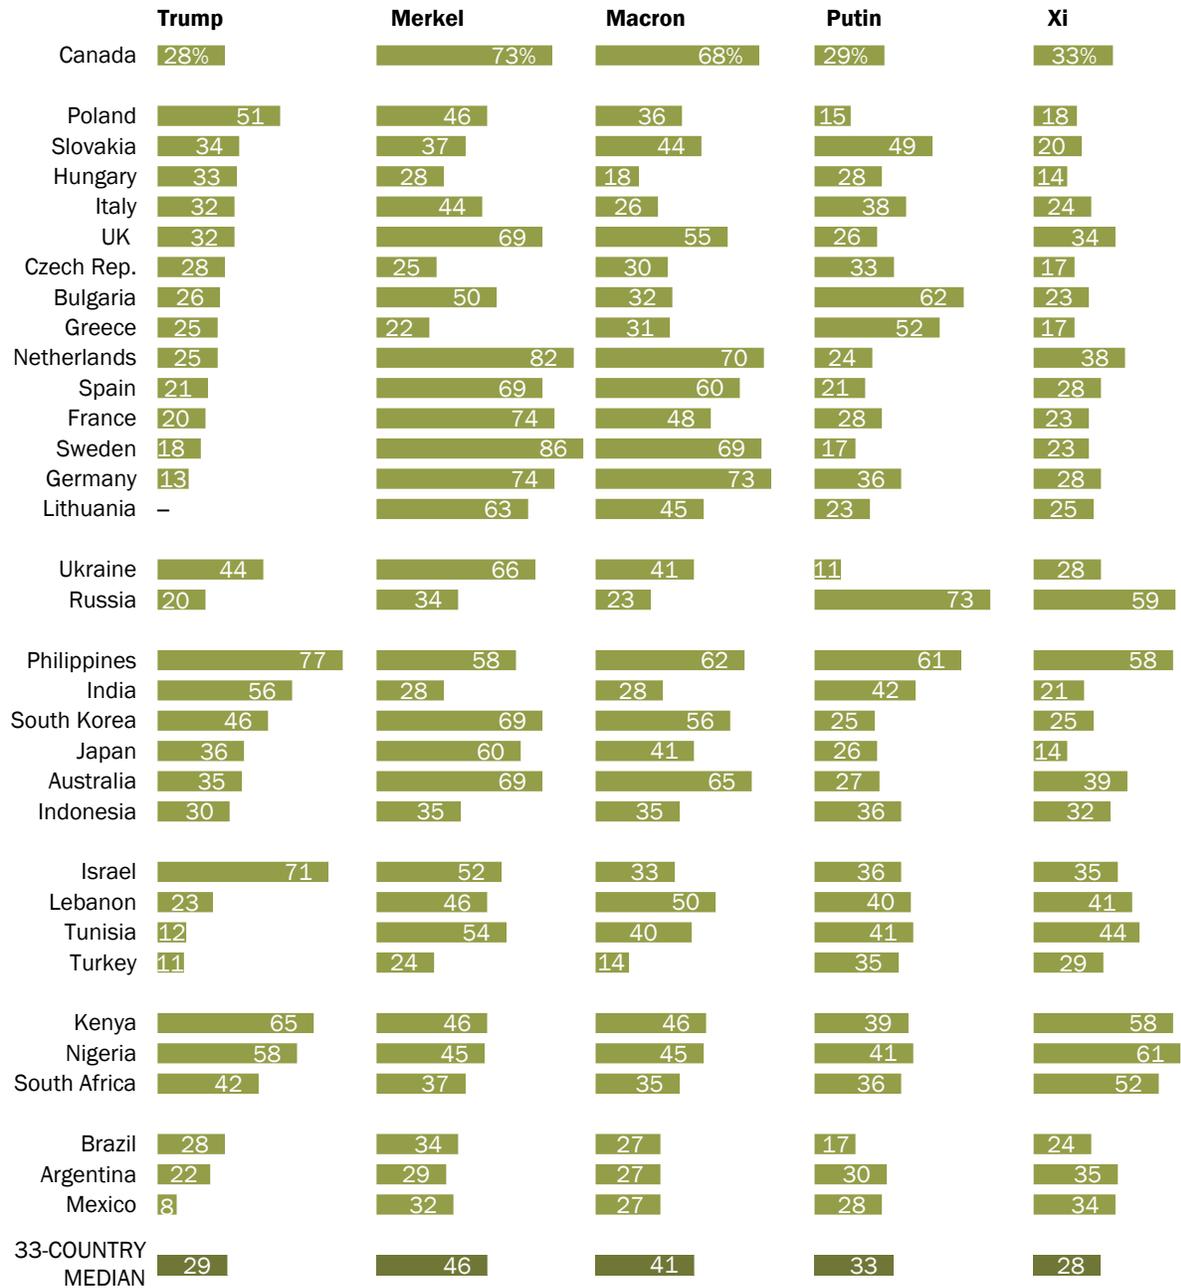

Support for a right-wing populist party and views of European leaders are related. In 10 countries, those with [favorable views of a right-wing populist party](#) are also more likely to have confidence in Putin when it comes to world affairs. At the same time, those who dislike a right-wing group tend to hold positive views of Macron (eight countries) and Merkel (seven countries).

Publics in most of the countries surveyed [lack confidence in Xi Jinping](#). His highest ratings come mostly from countries in Africa and the Middle East, including 61% in Nigeria, 58% in Kenya, 52% in South Africa, 44% in Tunisia and 41% in Lebanon. Filipinos and Russians generally voice confidence in the Chinese president as well.

Many publics express the least confidence in Trump of any world leader asked about. For example, four-in-ten or more in Tunisia trust Merkel, Xi, Putin and Macron to do the right thing in international affairs, but only 12% trust Trump. Similarly, roughly three-in-ten Mexicans have confidence in the leaders of China, Germany, Russia and France, compared with 8% who have confidence in the U.S. president. Overall, Trump falls at the bottom of the list in about one-third of the countries surveyed. The same is true for Presidents Putin and Xi.

Ratings of world leaders

% who have confidence in ___ to do the right thing regarding world affairs

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

2. Little support for Trump’s international policies

Overall, there is little support for several of Donald Trump’s signature foreign policies across the 33 countries surveyed in 2019.

Looking at the median levels of support across these countries, disapproval is strongest for Trump’s policies of the U.S. increasing tariffs or fees on imported goods from other countries, the U.S. withdrawal from international climate change agreements, and the U.S. building a wall on the U.S.-Mexico border. Fewer than half in all 33 countries surveyed approve of these policies.

Global publics also disapprove of the Trump administration’s policy of allowing fewer immigrants into the U.S.

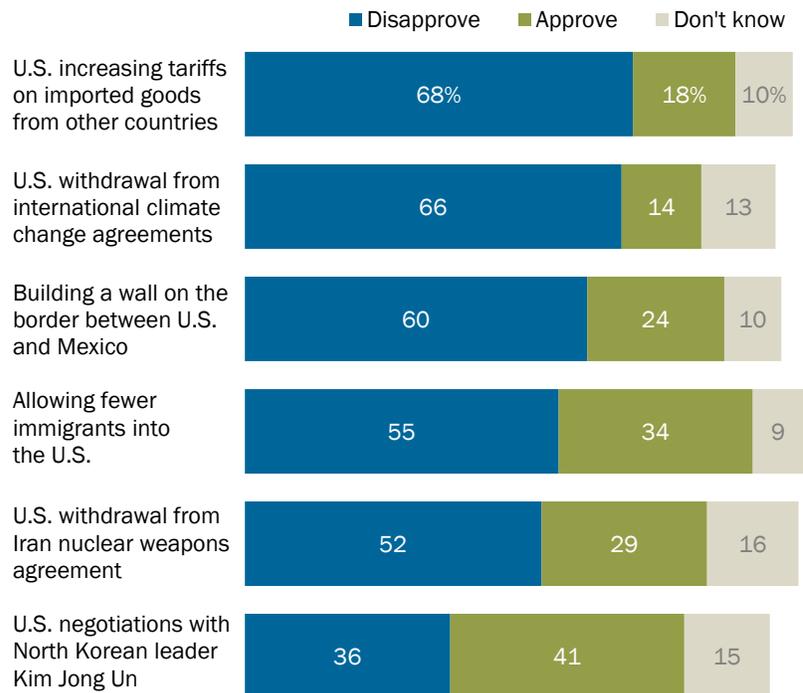

However, there is some support for the U.S. restricting immigration among Israelis and some publics in Central and Eastern Europe.

Additionally, most publics disapprove of the U.S. withdrawing from the Iran nuclear weapons agreement, but Israelis support this action. Israelis also support moving the U.S. Embassy to Jerusalem, while Tunisians, Lebanese and Turks strongly disapprove of this policy.

Trump garners strongest approval for his negotiations with North Korean leader Kim Jong Un over the country’s nuclear weapons program. This includes majority approval from people in

Japan and South Korea, as well as Israel, the UK, the Netherlands, Australia, Poland and Germany.

Trump's tariff policy

Around the world, there is strong disapproval of Donald Trump's policy of the U.S. increasing tariffs or fees on imported goods from other countries. Across the 33 countries surveyed, a median of 68% disapprove of this policy, while only 18% approve. Majorities or pluralities in every country surveyed disapprove of Trump's tariff policy.

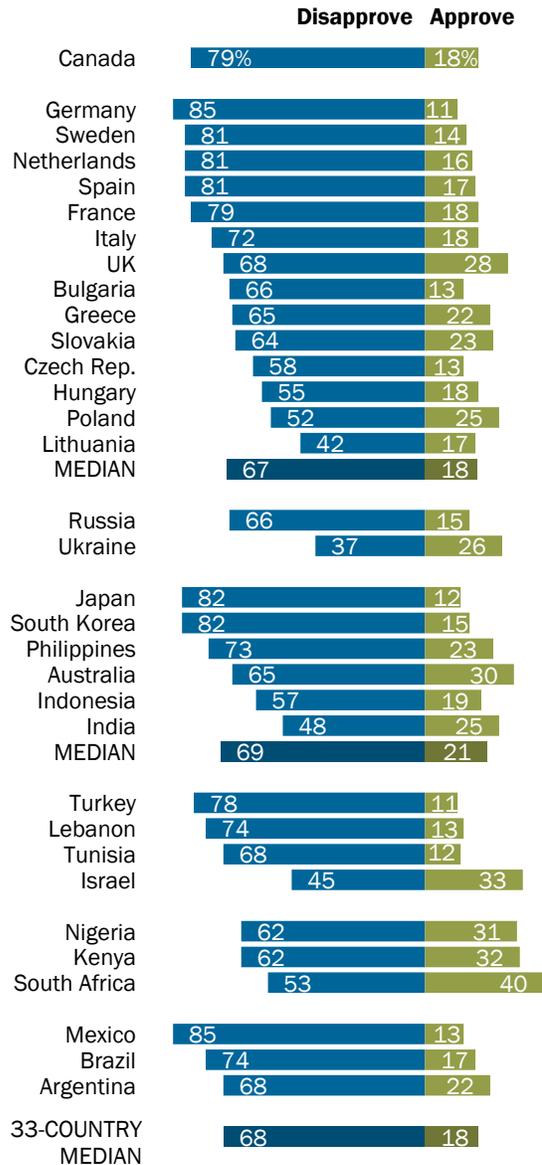

In Europe, disapproval is highest in Germany (85%), which has been [hit particularly hard by the trade war](#), but across the European continent, a median of two-thirds disapprove of the policy. Similarly, across the Asia-Pacific region, a median of 69% disapprove of the tariffs, including 82% in Japan and South Korea.

Majorities across much of the Middle East, Africa and Latin America also disapprove of the tariff policy, including 85% who disapprove in Mexico, historically one of the [largest U.S. trading partners](#). The highest support for Trump's trade policy comes from South Africa (40% approve), but even there, most disapprove.

As with overall confidence in Trump (see [Chapter 1](#)), those on the right of the ideological spectrum and supporters of right-wing populist parties in Europe show more approval of Trump's tariff policy. Individuals with lower

PEW RESEARCH CENTER

and higher incomes disapprove of the tariff policy relatively equally across most of the countries surveyed.

Trump's climate change policy

Majorities or pluralities in all 33 countries surveyed disapprove of the Trump administration's intent to withdraw from international climate change agreements. Trump first announced the decision to pull out of the Paris climate accord in June 2017 but [recently made the decision official](#). A median of 66% across the 33 countries disapprove of this action and 14% approve.

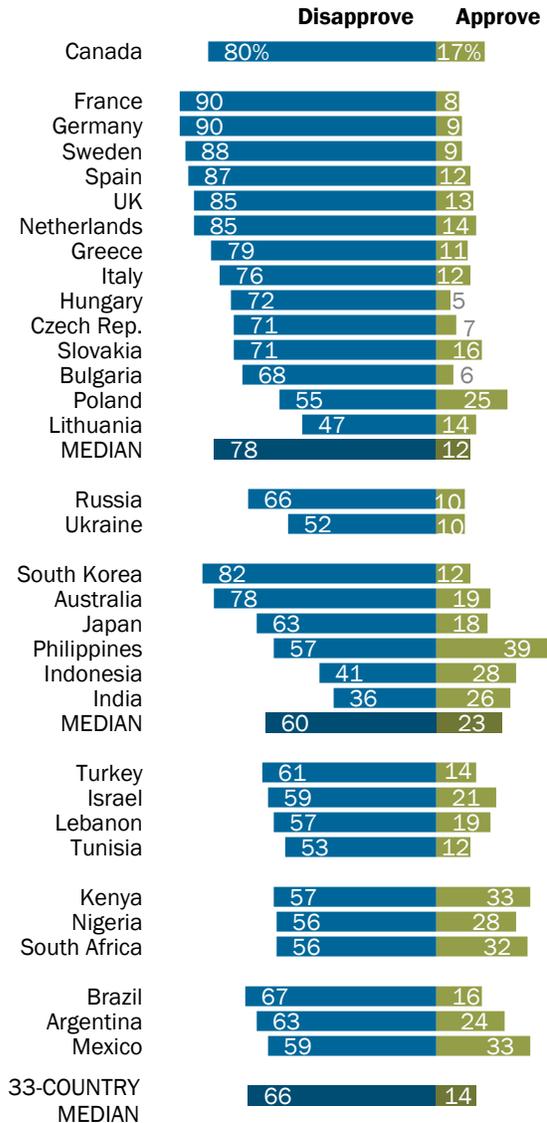

Disapproval of Trump's defining climate change policy is particularly strong in Europe, where a median of 78% disapprove. This includes about nine-in-ten who disapprove in France, Germany, Sweden and Spain.

Around eight-in-ten South Koreans (82%) and Australians (78%) also disapprove of the U.S. withdrawal from climate accords. And more than half across Middle Eastern, African and Latin American countries surveyed disapprove as well. Even in Israel, which shows general support for several of Trump's policies, 59% disapprove of pulling out of the international climate accords.

There has been minimal change on overall opposition to Trump's climate policies since 2017 across most of the countries surveyed. However, support for pulling the U.S. out of the climate agreement rose in the Philippines and

Trump's withdrawal from international climate change agreements gets poor marks, especially in EU

Mexico (+14 percentage points) and fell in Russia (-17 points). Still, now as with then, most disapprove of the policy.

People with less education and those on the right politically tend to show more support for Trump’s climate policies. And despite [recent large-scale protests about climate](#) among the world’s youth population, both young and old tend to disapprove of the U.S. withdrawal from major climate change agreements at similar rates.

Trump’s U.S.-Mexico border wall

Across the 33 nations polled, a median of six-in-ten disapprove of building a wall on the border of the U.S. and Mexico, one of Trump’s [well-known campaign promises](#).

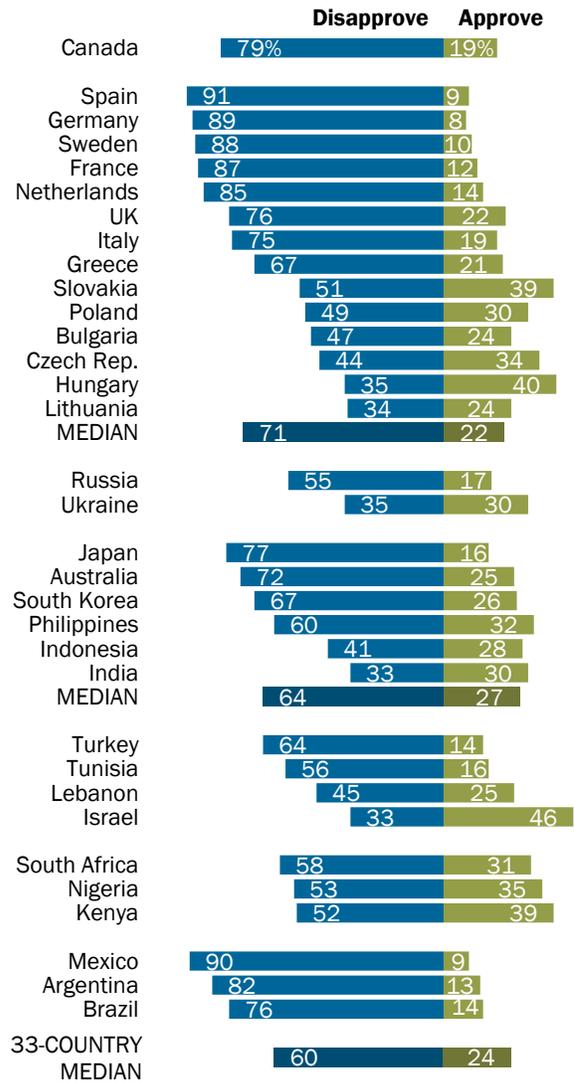

Latin Americans are among the most opposed to building the wall, including 90% of Mexicans themselves. Canadians also overwhelmingly disapprove.

Opposition to the wall is also very high in Western Europe, where more than eight-in-ten in Spain, Germany, Sweden, France and the Netherlands disapprove of the policy. There is also strong displeasure across the Asia-Pacific with building a wall at the southern U.S. border (a median of 64% disapprove). Majorities in most Middle Eastern and African countries also oppose the policy.

There is somewhat more support for the wall in Israel, Slovakia, Hungary and Kenya, but fewer than half in all countries surveyed say they approve of the project.

Trump’s border wall continues to be unpopular, especially in Latin America

 “Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable”

PEW RESEARCH CENTER

Since 2017, there has been significant upward movement in approval for building the wall in eight countries surveyed. For example, South Koreans are 14 percentage points more likely to approve of building the wall than they were in 2017. However, even though support has grown in these countries, majorities or pluralities in each one still disapproves of the wall.

Meanwhile, support for building a wall has halved in Russia over the same time period.

As with other Trump policies, those with a more right-leaning ideology tend to be more supportive of building a wall on the U.S.-Mexico border.

Approval of the border wall between U.S. and Mexico has increased since 2017 in some countries

% who approve of building a wall on the border between the U.S. and Mexico

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

Trump’s immigration policy

Across 33 countries, most disapprove of Trump’s policies to allow fewer immigrants into the U.S., but there are notable exceptions.

In Europe, for example, a median of 51% disapprove of the policy, but this masks relative support among many Central and Eastern Europeans for restricting immigration into the U.S. While majorities in Sweden, Germany, Netherlands, France, Spain and the UK oppose Trump’s immigration policy, about half or more in Hungary, Slovakia and Poland (as well as a plurality in the Czech Republic) approve.

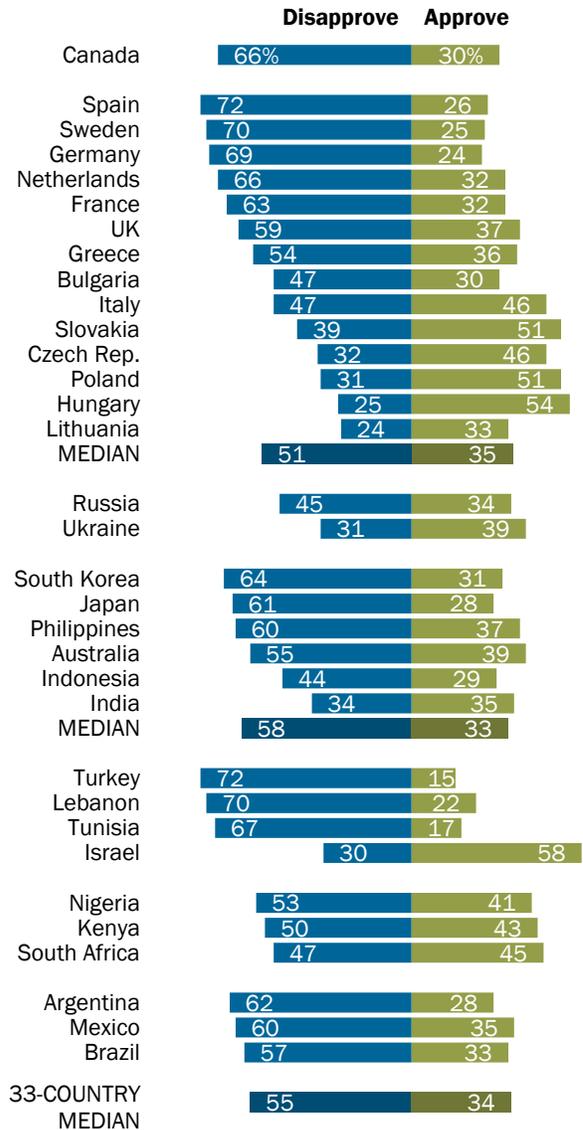

Most in Asia-Pacific, Middle East and North African and Latin American countries disapprove of restricting immigration into the U.S. One clear exception is in Israel, where 58% support Trump’s policy of limiting migrants, the highest such support across the survey.

There are consistent demographic patterns on this question as well, with ideologically right-oriented respondents expressing more approval than those on the left in most countries. For example, six-in-ten of those who place themselves on the right end of the ideological spectrum in Italy say they approve of Trump’s immigration policies, vs. only 26% among left-leaning Italians.

In a few countries, those in rural areas are also more likely to support restricting immigration into the U.S., including in the UK, where 41% who live in rural areas support the policy compared with 24% in urban areas.

Most disapprove of Trump’s policy to allow fewer immigrants into U.S., but some support it in Israel, Central and Eastern Europe

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

Trump's withdrawal from Iran nuclear deal

In most countries surveyed, majorities or pluralities disapprove of the U.S. withdrawal from the Iran nuclear weapons agreement (also known as the Joint Comprehensive Plan of Action or JCPOA), which was signed in 2015 by the five permanent members of the UN Security Council and Germany, known as the P5+1. President Trump withdrew the U.S. from the agreement in May 2018, after which sanctions were reimposed on Iran for its weapons development programs and support for militant groups.

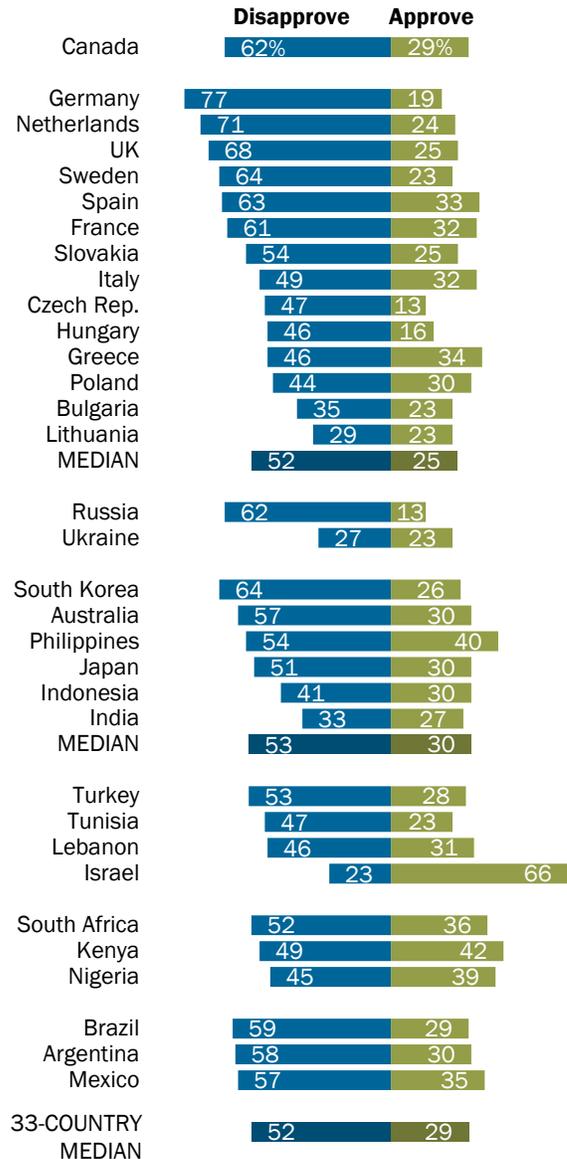

Across Europe, a median of 52% disapprove of this action and no more than about a third in any European country approve of Trump's Iran policy. However, this particular policy is less well-known than some of the others tested, and substantial portions of the population in many countries do not express an opinion.

Similarly, in Asia-Pacific countries, there is general disapproval of this action, but many in India do not hold an opinion. On balance, there is also disapproval of Trump's Iran policy in the sub-Saharan African and Latin American countries surveyed.

In the Middle East and North Africa, attitudes are more mixed, with mild disapproval for the U.S. withdrawing from the Iran agreement in Turkey, Tunisia and Lebanon, but strong support from Israelis (66% approve). Among Jewish Israelis, 75% approve of the U.S.

PEW RESEARCH CENTER

withdrawal from JCPOA, compared with only 28% of Arab Israelis.

Far fewer in Russia approve of the withdrawal from the JCPOA (Russia is one of the P5+1 countries) than did in 2017, when equal numbers approved and disapproved of the policy (38%). In the other P5+1 countries surveyed (France, UK, Germany), there has been little change for approval on Trump's Iran policy since 2017. In a few other countries, namely Tunisia, Lebanon, Hungary and Brazil, support for the Iran policy has also dropped by double digits since 2017.

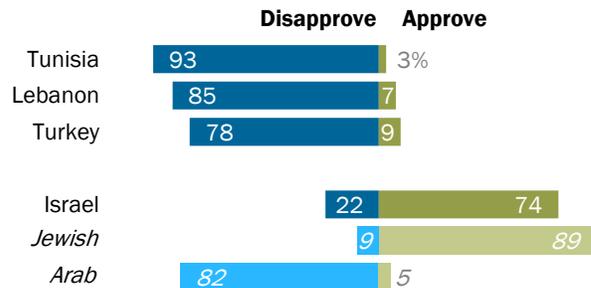

Trump's U.S. embassy move in Israel

In three Middle East and North African nations, extremely large majorities disapprove of Trump's decision to move the U.S. Embassy in Israel to Jerusalem from Tel Aviv. This includes 93% of Tunisians, 85% of Lebanese and 78% of Turks.

In Israel itself, however, 74% approve of Trump's decision, while only 22% disapprove. However, 82% of Arab Israelis *disapprove* of the policy as 89% of Jewish Israelis approve.

Israelis approve of move of U.S. Embassy to Jerusalem, but others in region disapprove

PEW RESEARCH CENTER

Trump’s North Korea policy

Of all of Trump’s foreign policies asked in the survey, his direct negotiations with North Korean leader Kim Jong Un garners the most support. Still, only a median of 41% across the 33 countries surveyed approve of this action, compared with 36% who disapprove.

Roughly half or more in 11 of the 33 countries approve of Trump’s negotiations with Kim Jong Un over North Korea’s nuclear weapons program, which culminated in a historic meeting between the two leaders [in Singapore on June 12, 2018](#). This includes 80% in Japan and 78% in South Korea, two countries that have the potential to be most impacted by North Korea’s missiles and nuclear weapons arsenal. Additionally, 62% in Australia approve of Trump’s North Korea talks.

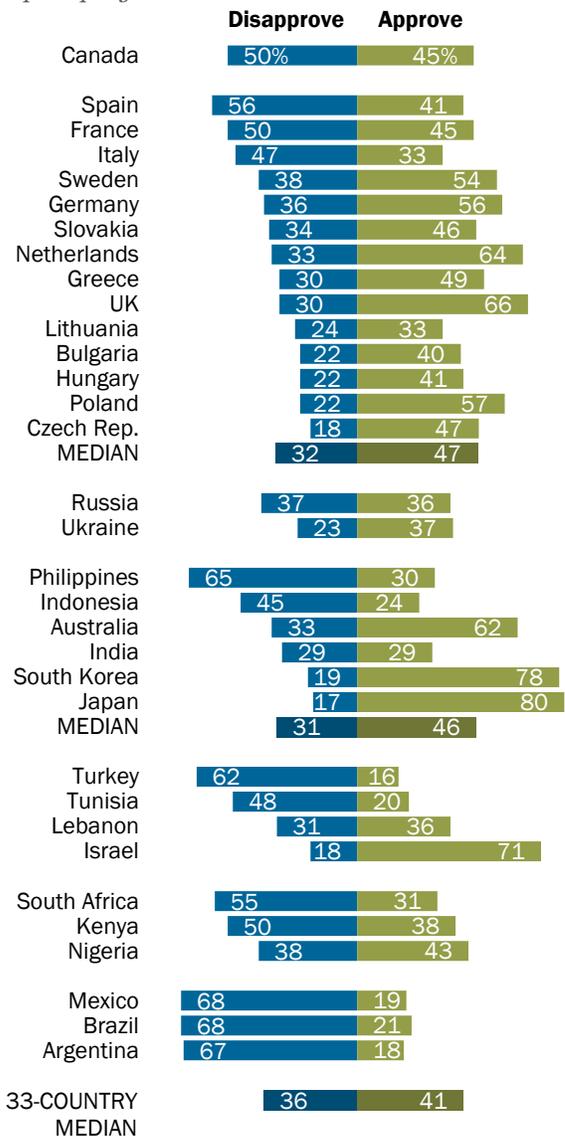

In Europe, majorities in the UK, the Netherlands and Germany approve of the negotiations, the only Trump policy in each of those nations that has such support. Trump also received high levels of support from Poles, Swedes and Israelis on this policy.

In the Middle East, Africa and Latin America, there is general disapproval of Trump negotiations with Kim, or in many cases, large shares of the population hold no opinion.

In South Korea, majorities among people on the left and right approve of this policy, although

Mixed support for Trump’s talks with Kim Jong Un, but South Koreans and Japanese overwhelmingly approve

PEW RESEARCH CENTER

people on the left end of the political spectrum are more supportive (90%) than those on the right (71%).

Gender is a factor in opinion of Trump's negotiations with the North Korean leader over his nuclear weapons program. Men are significantly more likely than women to approve of Trump's North Korea talks in 23 of the 33 countries surveyed. This includes double-digit gender gaps across most of Europe, Canada, Australia and Latin America. However, in many of the countries surveyed women are significantly more likely than men to not answer the question.

3. U.S. image generally favorable around the world, but mixed in some countries

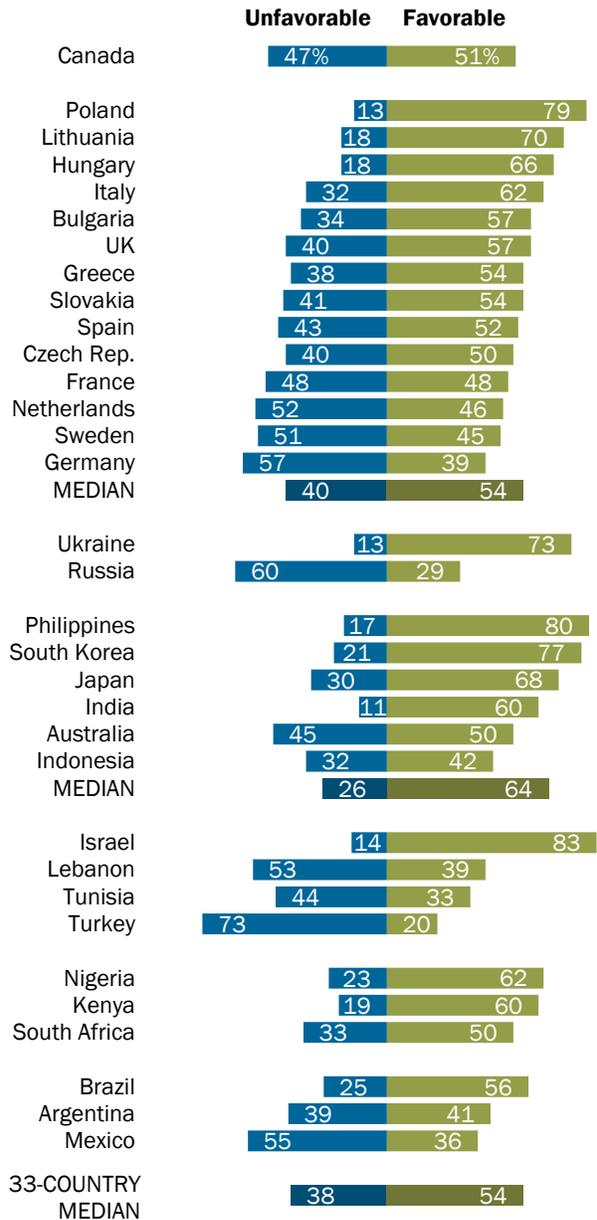

Views of the U.S. are generally positive across 33 countries surveyed in 2019, as a median of 54% say they have a favorable opinion of the U.S., compared with 38% who have an unfavorable view. Ratings are particularly positive in Poland, the Philippines, South Korea and Israel – in each about eight-in-ten say they view the U.S. favorably. However, in Germany, Russia, Turkey and Mexico, a majority of people say that they have a *negative* view of the U.S.

Across the 14 European countries surveyed, views of the U.S. are generally positive (a median of 54% favorable vs. 40% unfavorable). However, the extent to which publics view the U.S. favorably ranges considerably in Europe, from 79% in Poland to 39% in Germany expressing a positive view.

Across the countries surveyed in the Asia-Pacific region, views of the U.S. are positive, albeit more mixed in Australia. Views are also more mixed in Indonesia, where people are more likely to not give a response as to whether they favor the U.S. or not. In the Philippines and South Korea, about eight-in-ten say they have a favorable view of the U.S. And 68% in Japan and 60% in India say they like the U.S. (29% in India also offer no opinion).

Views of the U.S. generally positive, but somewhat mixed in Western Europe and Middle East and North Africa

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

Sentiment toward the U.S. varies more across the four Middle East and North African countries surveyed. Views are particularly positive among Israelis, but there is a sharp ethnic split in the country; among Jewish Israelis, 94% express a favorable opinion of the U.S., compared with only 38% of Arab Israelis. Views tend to be more negative in Lebanon, where only 39% of the total population views the U.S. positively. About half of Christians in that country (51%) view the U.S. positively, compared with 41% of Sunni Muslims and only 11% of Shia Muslims.

Across the three sub-Saharan African countries surveyed, views of the U.S. tilt positive, though somewhat less so in South Africa, where half have a favorable view. In Nigeria and Kenya, more than half (62% and 60% respectively) say they view the U.S. positively. Christians in Nigeria have a more favorable opinion of the U.S. (69%) than do Muslims (54%).

Opinions are more mixed in Latin America, with a majority in Brazil holding a positive view (56%) but a majority in Mexico viewing the U.S. negatively (55%). In Argentina, views are nearly evenly split, as about four-in-ten each say they have favorable and unfavorable view.

Positive assessments of the U.S. rose in some countries from 2018 to 2019, particularly among right-leaning people

In some countries, views of the U.S. have become more positive since 2018. This increase in favorable views of the U.S. is especially prevalent among those who favor right-wing populist parties or place themselves on the right end of the ideological spectrum.

In Europe, positive regard for the U.S. increased among those who favor right-wing populist parties, but the extent to which there has been an increase varies across countries. In the Netherlands, for example, about two-thirds (65%) of those who favor Forum for Democracy (FvD) said they have a favorable view of the

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

In many countries, younger people have a more favorable view of the U.S.

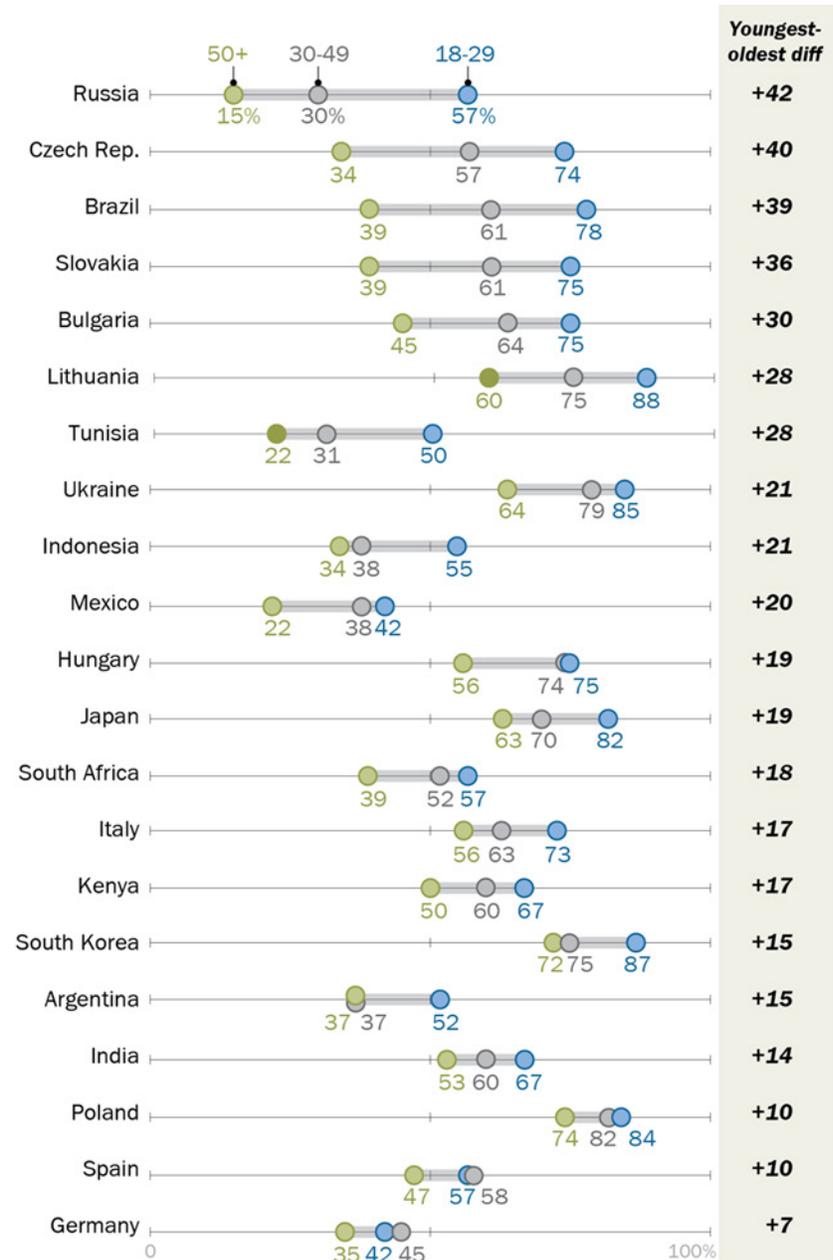

As has been the case in previous surveys, young people tend to express more positive opinions about the U.S. In 21 of the 33 countries surveyed, those ages 18 to 29 have a more favorable view of the U.S. than people 50 and older.

The largest differences between the youngest and oldest tend to be found in formerly communist countries, including Russia, the Czech Republic, Slovakia, Bulgaria, Lithuania, Ukraine and Hungary. In these countries, the difference between the youngest and oldest is at least 19 percentage points. For example, in Russia, 57% of those 18 to 29 have a positive view of the U.S., compared with only 15% of those 50 and older.

Differences of 19 percentage points or more are also seen in Brazil (39 points), Tunisia (28 points), Indonesia (21 points), Mexico (20 points) and Japan (19 points).

In many countries, younger people view U.S. more positively

% who have a favorable view of the U.S.

Note: Only statistically significant differences shown. In many countries, older respondents were significantly less likely than younger respondents to answer the question. Source: Spring 2019 Global Attitudes Survey. Q8a.

"Trump Ratings Remain Low Around Globe, While Views of U.S. Stay Mostly Favorable"

PEW RESEARCH CENTER

In some countries there are also significant differences between men and women in assessments of the U.S. The country with the greatest difference is Australia, where 60% of men but only 39% of women say they favor the U.S., a difference of 21 percentage points. Stark differences also exist in Canada (18 points), Spain (17), Sweden (17), India (16), the Netherlands (14), the UK (14), Brazil (14), and Germany, Argentina and Japan (each 10 points).

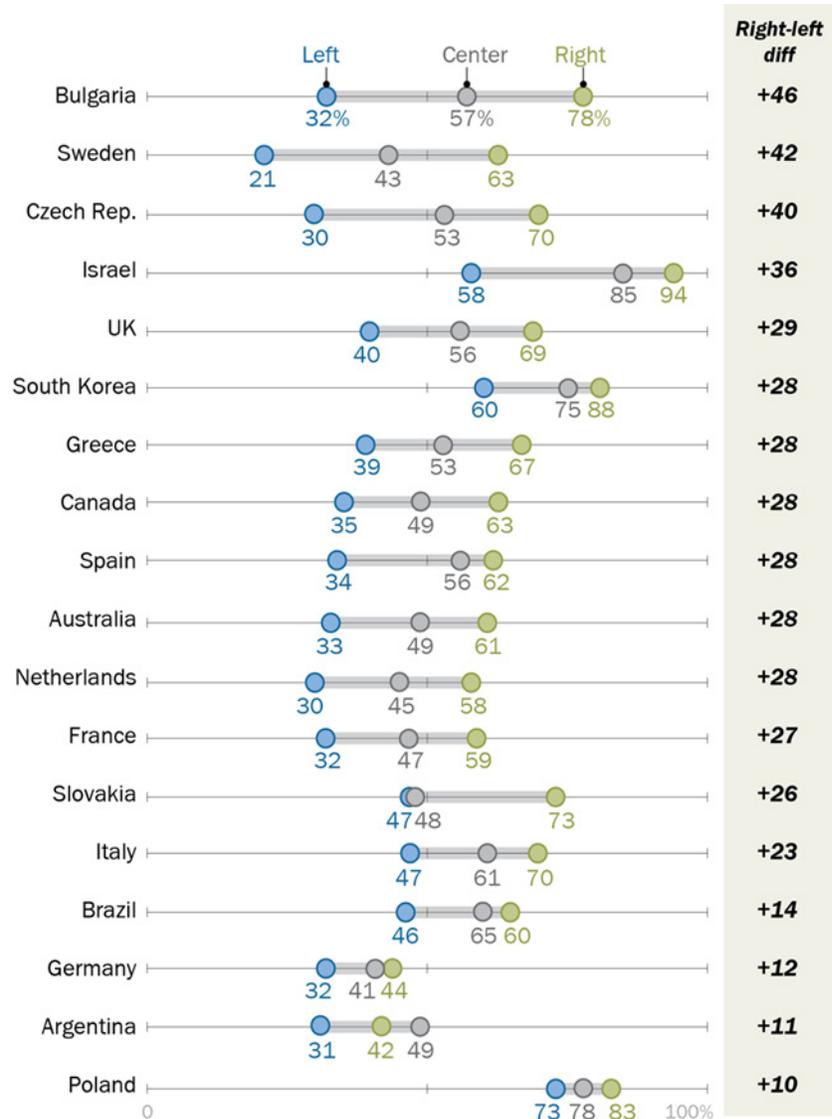

In many countries, those on the political right view the U.S. more favorably than those on the left

In many of the countries surveyed that are asked about ideology, those on the political right have a significantly more positive view of the U.S. than those on the left. In most of these countries, about six-in-ten or more of people who place themselves on the political right say they have a favorable opinion of the U.S.

The difference between those on the political left and political right is especially stark in some countries. For example, 78% of Bulgarians on the political right say they have a positive view of the U.S., whereas only 32% on the left do, a 46 percentage

Those on the political right view U.S. more favorably than those on the left in many countries

% who have a favorable view of the U.S.

Note: Only statistically significant differences shown.

point difference. Differences between these groups are also greater than 30 percentage points in Sweden (42 points), the Czech Republic (40 points) and Israel (36 points).

Appendix: Classifying European political parties

Classifying parties as populist

Although experts generally agree that populist political leaders or parties display high levels of anti-elitism, definitions of populism vary. We use three measures to classify populist parties: anti-elite ratings from the [2017 Chapel Hill Expert Survey \(CHES\)](#), Inglehart and Norris's [populism party scale](#) and [The PopuList](#). We define a party as populist when at least two of these three measures classify it as such.

CHES, which was carried out in January and February 2018, asked 228 regional experts to evaluate the 2017 positions of 132 European political parties across 14 European Union member states. CHES results are regularly used by academics to classify parties with regard to their left-right ideological leanings, their key party platform positions and their degree of populism, among other things.

We measure anti-elitism using an average of two variables in the CHES data. First, we used “PEOPLE_VS_ELITE,” which asked the experts to measure the parties with regard to their position on direct vs. representative democracy, where 0 means that the parties support elected officeholders making the most important decisions and 10 means that “the people,” not politicians, should make the most important decisions. Second, we used “ANTI-ELITE_SALIENCE,” which is a measure of the salience of anti-establishment and anti-elite rhetoric for that particular party, with 0 meaning not at all salient and 10 meaning extremely salient. The average of these two measures is shown in the table below as “anti-elitism.” In all countries, we consider parties that score above a 7.0 as “populist.”

We also used CHES's “FAMILY” variable to further classify populist groups. [Per CHES](#), family attribution is based on a combination of “a) membership or affiliation with [European Parliament] party families, b) ParlGov classifications and c) self-identification.”

Inglehart and Norris emphasize the cultural views of populist parties and created a populist party scale using the [2014 CHES data](#) for classification.⁴ This scale aggregates expert ratings of the party on the following positions and attitudes: 1) support for traditional social values, 2) opposition to liberal lifestyles, 3) promotion of nationalism, 4) favorable toward tough law and order, 5) favorable toward assimilation for immigrants and asylum seekers, 6) support for restrictive immigration policies, 7) opposition to more rights for ethnic minorities, 8) support for religious

⁴ Inglehart, Ronald F., and Pippa Norris. 2016. “[Trump, Brexit, and the Rise of Populism: Economic Have-Nots and Cultural Backlash](#).” HKS Faculty Research Working Paper Series.

principles in politics and 9) support for rural interests. The scale ranges from 0 to 100, and parties with a score of more than 80 are classified as populist.

The PopuList is an ongoing project to classify European political parties as populist, far right, far left and/or euroskeptic. [The project](#) specifically looks at parties that “obtained at least 2% of the vote in at least one national parliamentary election since 1998.” It is based on collaboration between academic experts and journalists. The PopuList classifies parties that emphasize the will of the people against the elite as populist.⁵

Two parties are missing data for at least two of the measures used for classification but are still included for analysis in the report. Vox in Spain is considered a [right-wing populist party](#) by experts, but was not included in any of the measures used due to its relatively [recent rise](#) in popularity. Similarly, [Forum for Democracy \(FvD\)](#) in the Netherlands did not achieve a large enough share of the votes to be included in the PopuList analysis and was founded in 2016, after data collection for the Inglehart and Norris analysis. Experts in the most recent round of CHES classify this party as a right-wing populist party, and its score on the anti-elitism scale exceeds the cut-off.

Classifying parties as left, right or center

We can further classify these traditional and populist parties into three groups: left, right and center. When classifying parties based on ideology, we relied on the variable “LRGEN” in the CHES dataset, which asked experts to rate the positions of each party in terms of its overall ideological stance, with 0 meaning extreme left, 5 meaning center and 10 meaning extreme right. We define left parties as those that score below 4.5 and right parties as those above 5.5. Center parties have ratings between 4.5 and 5.5.

⁵ Mudde, Cas. 2004. [“The Populist Zeitgeist.”](#) Government and Opposition.

European populist party classifications

Party	Country	Family	Left-right	Anti-elitism	Inglehart & Norris	The PopuList
Populist parties on the left						
La France Insoumise	France	Radical left	1.0	8.9	--	Populist
Podemos	Spain	Radical left	2.4	8.7	Populist	Populist
Syriza	Greece	Radical left	2.6	7.4	Populist	Populist
Populist parties in the center						
Action of Dissatisfied Citizens (ANO 2011)	Czech Rep.	No family	4.9	7.7	Not populist	Populist
Five Star Movement (M5S)	Italy	No family	5.2	9.9	Populist	Populist
Populist parties on the right						
Ordinary People and Independent Personalities (OLaNO-NOVA)	Slovakia	Conservative	6.9	7.2	Not populist	Populist
Slovak National Party (SNS)	Slovakia	Radical right	7.6	4.1	Populist	Populist
Sweden Democrats	Sweden	Radical right	8.0	8.0	Populist	Populist
Freedom and Direct Democracy (SPD)	Czech Rep.	Radical right	8.2	9.8	--	Populist
Lega	Italy	Regionalist	8.3	7.8	Populist	Populist
Law and Justice (PiS)	Poland	Radical right	8.3	6.2	Populist	Populist
Kukiz'15	Poland	Radical right	8.3	8.8	--	Populist
Jobbik	Hungary	Radical right	8.5	7.8	Populist	Populist
UK Independence Party (UKIP)	UK	Radical right	8.6	8.2	Populist	Populist
Fidesz	Hungary	Conservative	8.7	5.7	Populist	Populist
Alternative for Germany (AfD)	Germany	Radical right	9.2	8.7	Populist	Populist
Party for Freedom (PVV)	Netherlands	Radical right	9.3	9.5	Populist	Populist
Forum for Democracy (FvD)	Netherlands	Radical right	9.5	9.5	--	--
National Rally	France	Radical right	9.7	8.9	Populist	Populist
Vox	Spain	--	--	--	--	--

Notes: Golden Dawn (XA) in Greece not included in analysis due to insufficient sample size. Questions about populist parties were not asked in Bulgaria or Lithuania. Left-right indicates the average score CHES experts gave each party on an 11-point left-right scale. Scores for anti-elitism are an average of party position on direct vs. representative democracy and the salience of anti-elite rhetoric within the party. Source: 2017 CHES. Inglehart and Norris (2016). The PopuList (2019).

Methodology

About Pew Research Center's Spring 2019 Global Attitudes Survey

Results for the survey are based on telephone and face-to-face interviews conducted under the direction of Gallup. The results are based on national samples, unless otherwise noted. More details about our international survey methodology and country-specific sample designs are [available here](#).

Topline questionnaire

**Pew Research Center
Spring 2019 Global Attitudes Survey
January 8, 2020 Release**

Methodological notes:

- Survey results are based on national samples. For further details on sample designs, see Methodology section and our [international survey methods database](#).
- Due to rounding, percentages may not total 100%. The topline “total” columns show 100%, because they are based on unrounded numbers.
- Since 2007, Pew Research Center has used an automated process to generate toplines for its Global Attitudes surveys. As a result, numbers may differ slightly from those published prior to 2007.
- Throughout this report, trends from India in 2013 refer to a survey conducted between December 7, 2013, and January 12, 2014 (Winter 2013-2014).
- For some countries, trends for certain years are omitted due to differences in sample design or population coverage. Omitted trends often reflect less representative samples than more recent surveys in the same countries. Trends that are omitted include:
 - India prior to Winter 2013-2014
 - Brazil prior to 2010
 - Nigeria prior to 2010
 - South Africa in 2007
 - Indonesia prior to 2005
 - Poland in March 2003
 - Russia in March 2003 and Fall 2002
- Not all questions included in the Spring 2019 Global Attitudes Survey are presented in this topline. Omitted questions have either been previously released or will be released in future reports.
