Public's 2019 Priorities: Economy, Health Care, Education and Security All Near Top of List

Growing share sees 'great deal of difference' between the parties

At the outset of Donald Trump's third year in office, the public's to-do list for the president and the 116th Congress spans domains with the economy, health care costs, education and preventing terrorism all cited as top priorities by majorities of Americans.

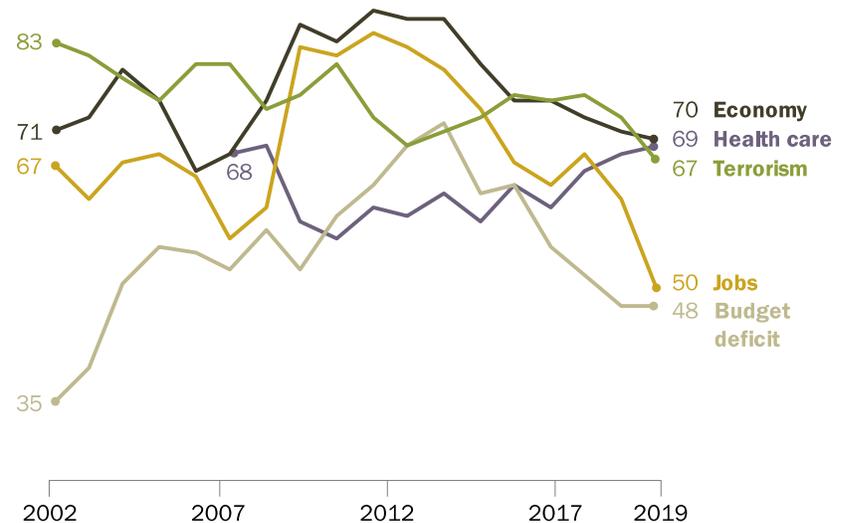

The public's agenda for the president and Congress is only modestly different from a year ago, but it reflects a continued evolution of the national agenda.

Improving the economy (70% top priority) remains among the public's highest priorities, but its prominence has waned significantly in recent years. In 2011, following the Great Recession, 87% called it a top priority. And as public ratings of the employment situation have [grown increasingly positive](#), 50% now say improving the job situation should be a top priority; in each of the previous 10 years, majorities cited jobs as a top priority, including 84% who said this in 2011 and 68% who said this as recently as 2017.

Most (67%) continue to say defending the country from future terrorist attacks is a top priority, though this is one of the lowest shares citing the issue since the Sept. 11 terrorist attacks and far lower than the roughly eight-in-ten who called it a top priority through much of the early to mid-2000s.

Economy, health care and terrorism among top public priorities, as concerns over jobs and deficit fade

% who say ____ should be a top priority for the president and Congress

Source: Survey of U.S. adults conducted Jan. 9-14, 2019.

PEW RESEARCH CENTER

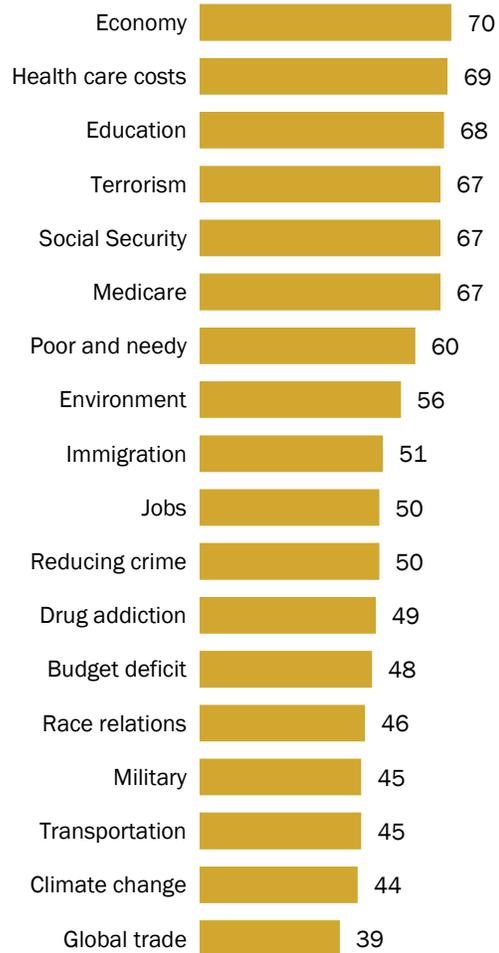

As economic and security concerns have become less prominent, the domestic issues of reducing health care costs (69% top priority) and improving the educational system (68%) now rank among the top tier of public priorities. About two-thirds also say that taking steps to make the Social Security (67%) and Medicare (67%) systems financially sound are top priorities for the country.

One issue that's not a major concern for the public: taking steps to reduce the budget deficit. Just 48% say reducing the deficit should be a top priority for the president and Congress this year. Concern over the budget deficit is much less widespread than it was during Barack Obama's administration. In 2013, 72% of the public – including 81% of Republicans and 65% of Democrats – said reducing the deficit should be a top priority.

The Pew Research Center survey, conducted Jan. 9-14 among 1,505 adults, finds that Republicans and Democrats continue to stake out markedly different priorities for the country.

Public's policy priorities for 2019

% who say ____ should be a top priority for Trump and Congress this year

Source: Survey of U.S. adults conducted Jan. 9-14, 2019.

PEW RESEARCH CENTER

Majorities of both parties place top priority on strengthening the economy, but a significantly larger share of Republicans and Republican-leaning independents (79%) than Democrats and Democratic leaners (64%) say this.

The pattern is the reverse when it comes to reducing health care costs, improving the educational system and taking steps to make the Medicare system financially sound; in all three cases, larger majorities of Democrats than Republicans call these issues top priorities for the country.

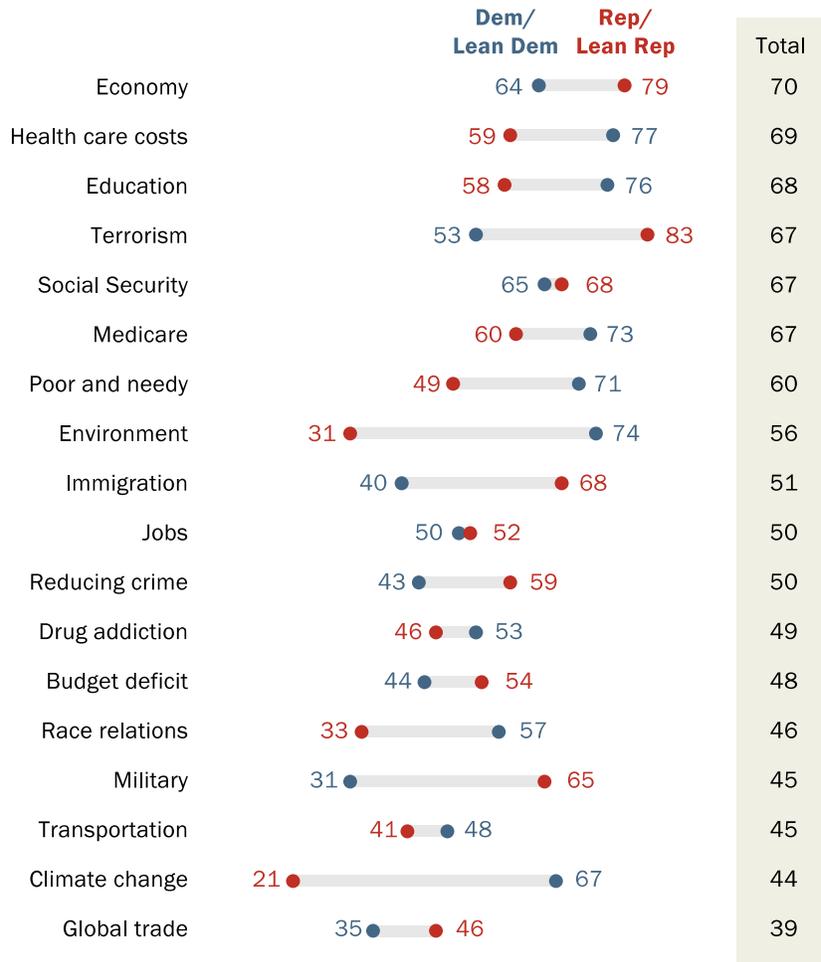

Partisans are even further apart when it comes to defending the country from future terrorist attacks: A large majority of Republicans (83%) calls this a top priority for the country, compared with a about half of Democrats (53%). And while most

Republicans place top priority on strengthening the military (65%) and dealing with immigration (68%), fewer than half of Democrats say the same.

By contrast, a majority of Democrats (71%) place the highest priority on dealing with the problems of poor and needy people, compared with 49% of Republicans.

Partisans far apart on the importance of many issues, including the environment and strengthening military

% who say ____ should be a top priority for Trump and Congress this year

Source: Survey of U.S. adults conducted Jan. 9-14, 2019.

PEW RESEARCH CENTER

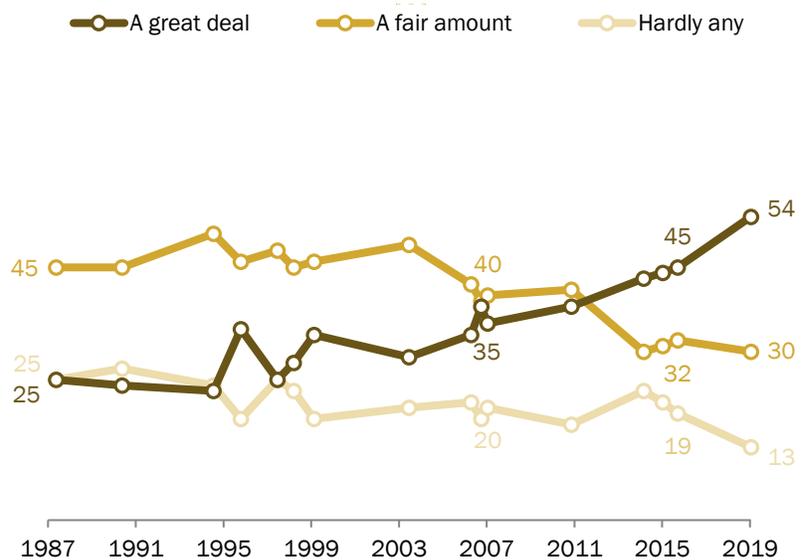

When it comes to the environment, Democrats are 43 percentage points more likely than Republicans to say protecting the environment should be a top priority (74% vs. 31%) and 46 points more likely to call global climate change a top priority (67% vs. 21%).

Taking steps to make the Social Security system financially sound is one of the only issues where comparable majorities of Republicans (68%) and Democrats (65%) say this should be a top priority for the country.

As the public stakes out its agenda for the president and Congress, Americans increasingly see a big difference in what the two parties stand for. For the first time since the question was first asked more than two decades ago, more than half (54%) now say there is a great deal of difference in what the Democratic and Republican parties stand for, compared with smaller shares who say there is a fair amount of difference (30%) or hardly any (13%). The share that sees a great deal of difference between the two parties is up from 45% who said this in 2015 and from just 35% who said this in 2007.

Majority now says there is a 'great deal' of difference between the Republican and Democratic parties

PEW RESEARCH CENTER

In a divided Washington, the public has low expectations for partisan cooperation in the coming year. About seven-in-ten (71%) think Republicans and Democrats in Washington will bicker and oppose one another more than usual this year; just 21% expect them to work together more than usual. This is one of the most pessimistic year-ahead outlooks over the past several administrations, matching the 71% who expected more partisan opposition in 2015, following the 2014 midterm elections. Majorities of both Republicans (78%) and Democrats (67%) think partisans in Washington will bicker and oppose one another more than usual this year.

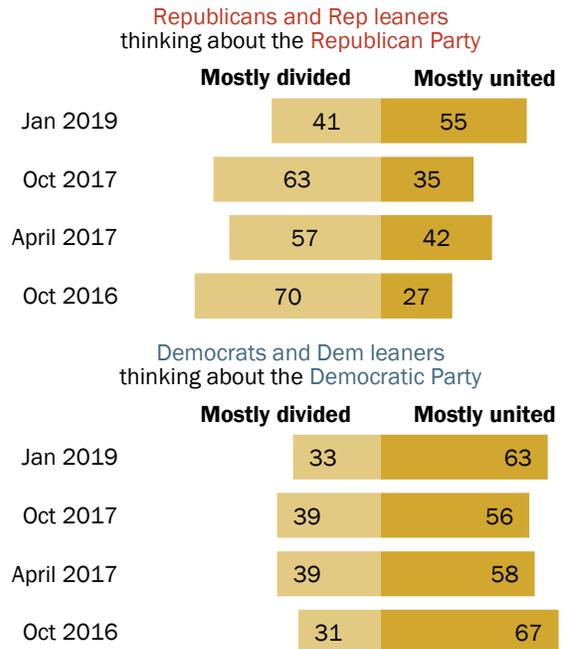

While the public expects greater discord between two parties they view as far apart, rank-and-file Republicans and Democrats see their own parties as united. Overall, 55% of Republicans and Republican leaners describe the GOP as mostly united on issues and its vision for the future.

This marks a major shift from October of 2017, when most Republicans (63%) said their party was divided.

Among Democrats and Democratic leaners, 63% describe the Democratic Party as united in its views on issues and vision for the future; in the fall of 2017, 56% said this.

Growing share of Republicans now see their party as united

% who say each party is ___ in its views on issues and vision for the future

Note: Don't know responses not shown.

PEW RESEARCH CENTER

Economic issues are now lower priorities for Republicans and Democrats

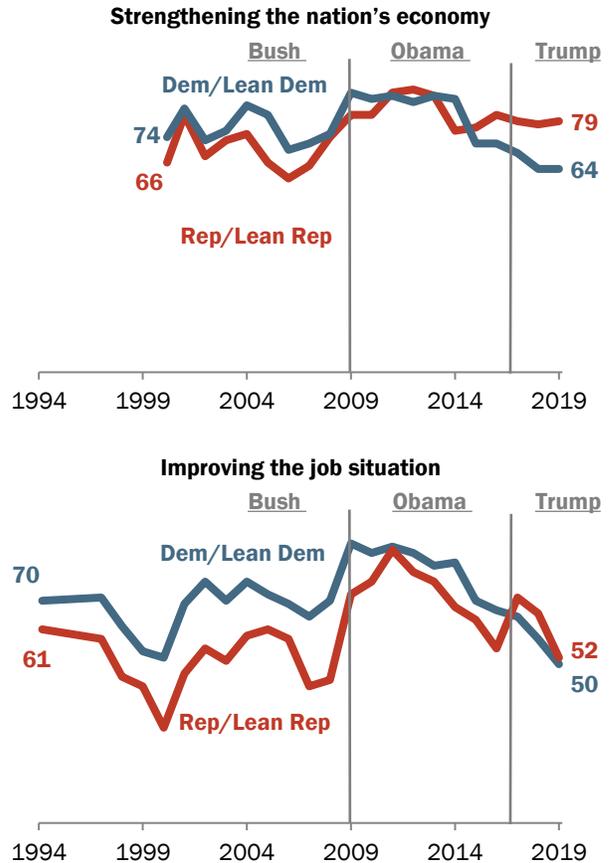

Strengthening the economy continues to rank as a top issue for 70% of the public overall – including nearly eight-in-ten Republicans (79%) and 64% of Democrats. While little changed from last year, both parties are now considerably less likely to cite the economy as a top priority than they were in the years following the Great Recession. In 2013, 87% of both Republicans and Democrats said improving the economy should be a top priority.

Over the past year, the importance of improving the job situation has declined among both Republicans and Democrats. A year ago, 66% of Republicans and Republican leaners said improving the job situation was a top priority for Congress and the president. Today, roughly half say this (52%) – a 14 percentage point drop.

There has been a more modest decline in the share of Democrats citing jobs as a top priority: 50% now say this, down from 58% a year ago.

Improving the job situation declines as a top priority for both parties

% who say ___ should be a top priority for Trump and Congress this year

Note: In 2001 and 2000, the item "strengthening the nation's economy" asked about "keeping the economy strong."

Source: Survey of U.S. adults conducted Jan. 9-14, 2019.

PEW RESEARCH CENTER

Wide partisan gap over importance of strengthening military

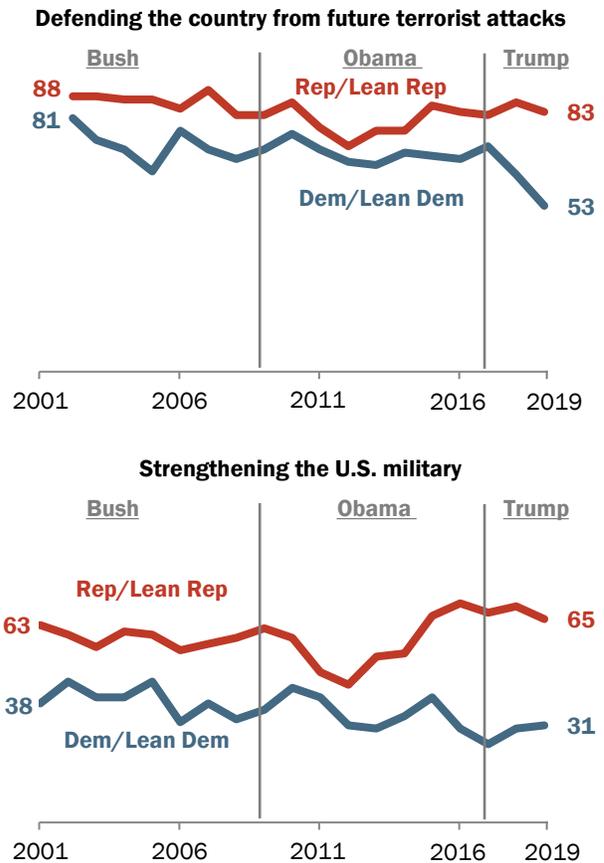

Today, 83% of Republicans and Republican leaners say defending the country from future terrorist attacks should be a top priority for the president and Congress this year. By contrast, only about half of Democrats (53%) say the same.

The share of Republicans giving top priority to defending the country from terror attacks has not changed much in recent years, but the share of Democrats saying this has declined significantly. In 2017, for instance, about seven-in-ten Democrats (72%) viewed defending the country from future terrorist attacks as a top priority for the president and Congress.

As has been the case for the last several years, Republicans are much more likely than Democrats to say strengthening the U.S. military should be a top priority: 65% of Republicans say this, compared with 31% of Democrats.

Fewer Democrats see terrorism defense as top priority for Trump and Congress

% who say ___ should be a top priority for Trump and Congress this year

PEW RESEARCH CENTER

Long-term changes in the public's priorities

The public's priorities have shifted over time and many issues are viewed differently today than they were at different moments over the past decade.

Economic issues have declined as top priorities for the public over the last several years. The share viewing "improving the job situation" as a top priority has fallen 34 percentage points since 2011 – and 12 points since last year alone.

Strengthening the nation's economy and reducing the budget deficit have also declined in the last eight years, although less sharply.

The share saying global climate change should be prioritized has increased substantially since 2011; then, just 26% of Americans said it should be a top priority for the president and Congress. Today, 44% say it should be a top priority.

Other issues that are given greater priority today than in 2011 include reducing health care costs, dealing with the problems of poor and needy people, protecting the environment and improving transportation infrastructure.

Public's policy priorities: 2011-2019

% who say ____ should be a top priority for the president and Congress

PEW RESEARCH CENTER

Public expects more partisan division in 2019

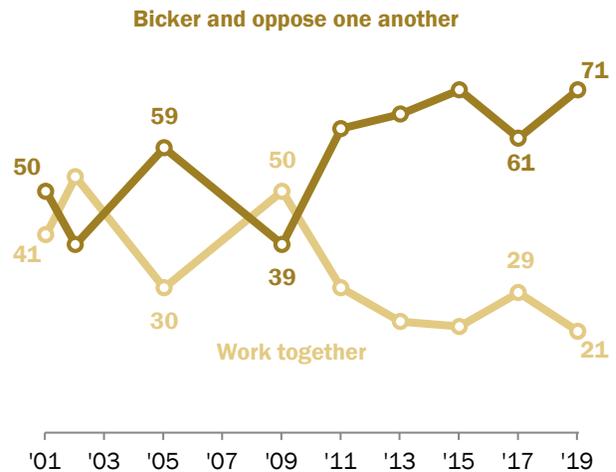

The public takes a deeply pessimistic view of the prospects for partisan cooperation in the coming year. About seven-in-ten (71%) say they think Republicans and Democrats in Washington will bicker and oppose one another more than usual this year; far fewer (21%) think they will work together to solve problems more than usual.

The share that expects greater partisan opposition in Washington is 10 points higher than it was in January 2017, following Donald Trump's presidential victory. It matches a high of 71% from January 2015, following the 2014 midterm elections.

Nearly eight-in-ten Republicans and Republican leaners (78%) expect partisans in Washington to bicker and oppose one another more than usual this year. A slightly smaller majority of Democrats and Democratic leaners (67%) also take this view.

Majority expects greater partisan squabbling in the year ahead

Do you think Republicans and Democrats in Washington will ___ more than usual? (%)

Note: Don't know responses not shown.

Source: Survey of U.S. adults conducted Jan. 9-14, 2019.

PEW RESEARCH CENTER

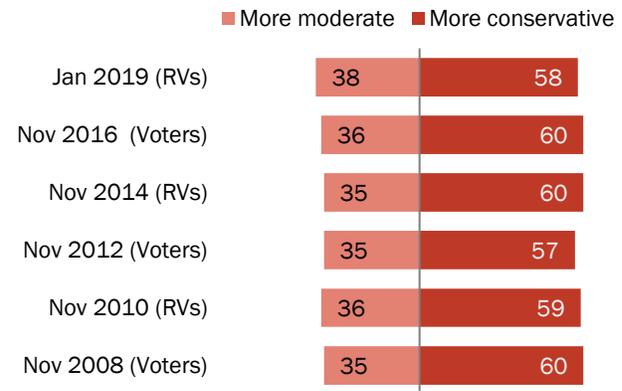

Views of the parties' ideological directions

Looking ahead, most Republicans want to see their party move in a more conservative direction. Nearly six-in-ten Republican and Republican-leaning registered voters (58%) say they want the GOP to move in a more conservative direction, compared with 38% who want it to move in a more moderate direction. Republican views on their preferred ideological direction for the party are about the same as they have been following other recent midterm and presidential elections.

Among Democratic and Democratic-leaning registered voters, somewhat more say they want the Democratic Party to move in a more moderate (53%) than more liberal (40%) direction. These views are about the same as they were following the 2014 midterm elections. In November 2016, after Trump's presidential election victory, a somewhat greater share of Democrats (49%) wanted the party to head in a more liberal direction.

Favorability ratings of the Republican and Democratic parties

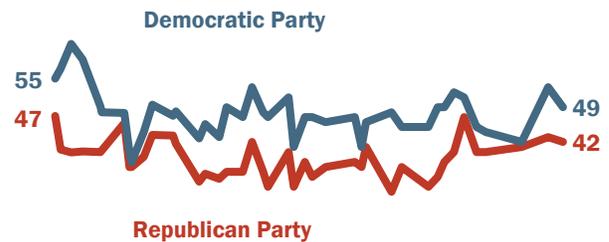

The Democratic Party continues to receive slightly higher favorability ratings than the Republican Party – though neither party is rated favorably by more than half of the public.

Overall, 49% have a favorable view of the Democratic Party, compared with about as many (47%) who hold an unfavorable view. Ratings of the Democratic Party have ticked down from September of last year (53%) but are comparable to where they have been at other points in the recent past.

Views of the Republican Party tilt negative, on balance: 54% hold an unfavorable view of the GOP, while 42% view the party favorably. Ratings of the Republican Party have changed little in recent years.

Methodology

The analysis in this report is based on telephone interviews conducted January 9-14, 2019 among a national sample of 1,505 adults, 18 years of age or older, living in all 50 U.S. states and the District of Columbia (388 respondents were interviewed on a landline telephone, and 1,117 were interviewed on a cell phone, including 724 who had no landline telephone). The survey was conducted by interviewers under the direction of SSRS. A combination of landline and cell phone random digit dial samples were used; both samples were provided by Marketing Systems Group. Interviews were conducted in English and Spanish. Respondents in the landline sample were selected by randomly asking for the youngest adult male or female who is now at home. Interviews in the cell sample were conducted with the person who answered the phone, if that person was an adult 18 years of age or older. Within the cell phone RDD frame, two strata were defined: numbers flagged as a pre-paid phone and numbers not flagged as such. Numbers servicing a pre-paid phone were sampled at a somewhat higher rate than other numbers. The weighting procedure corrected for the different sampling rates. For detailed information about our survey methodology, see <http://www.pewresearch.org/methodology/u-s-survey-research/>.

The combined landline and cell phone sample is weighted using an iterative technique that matches gender, age, education, race, Hispanic origin and nativity and region to parameters from the 2016 Census Bureau's American Community Survey one-year estimates and population density to parameters from the Decennial Census. The sample also is weighted to match current patterns of telephone status (landline only, cell phone only, or both landline and cell phone), based on extrapolations from the 2016 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size among respondents with a landline phone. To account for the oversample of pre-paid cell phone sample, an adjustment was made to the data before the sample was balanced to population parameters. The sample was adjusted so that the proportion of prepaid numbers in the entire sample matched the proportion of prepaid numbers in the base sample. The margins of error reported and statistical tests of significance are adjusted to account for the survey's design effect, a measure of how much efficiency is lost from the weighting procedures.

The following table shows the unweighted sample sizes and the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey:

Survey conducted January 9-14, 2019

Group	Unweighted sample size	Plus or minus ...
Total sample	1,505	3.0 percentage points
Half form	740 (min)	4.3 percentage points
Rep/Lean Rep	657	4.5 percentage points
Rep/Lean Rep half form	318 (min)	6.5 percentage points
Dem/Lean Dem	736	4.3 percentage points
Dem/Lean Dem half form	344 (min)	6.3 percentage points

Sample sizes and sampling errors for other subgroups are available upon request.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

Pew Research Center undertakes all polling activity, including calls to mobile telephone numbers, in compliance with the Telephone Consumer Protection Act and other applicable laws.
