No Improvement in Views of Economic News Casey Anthony Verdict Top Story for Public and Social Networkers

Americans followed news about the verdict in the Casey Anthony murder trial more closely than other top stories by a wide margin last week, but they also kept a watch on news about the nation's struggling economy and the talks in Washington over raising the federal debt limit.

Nearly four-in-ten (37%) say the Florida jury's controversial verdict, which found Anthony not guilty of murdering her toddler

daughter, was their top story of the week, according to the latest weekly News Interest Index survey conducted July 7-10 among 1,007 adults by the Pew Research Center for the People & the Press. Another 17% say they followed reports about the economy most closely, while 14% cite the deliberations over how to address the federal deficit and the national debt.

News about the economy and the debt limit debate together made up about a quarter of the newshole, according to the Pew Research Center's Project for Excellence in

News Interest vs. News Coverage

	News Interest	News Coverage
Casey Anthony Verdict	37	17
Economy	17	8
Deficit and national debt	14	17
Last space shuttle launch	5	5
2012 elections	4	3
Dominique Strauss-Kahn	1	3

News interest shows the percentage of people who say they followed this story most closely, Pew Research Center for the People & the Press, July 7-10, 2011. News coverage shows the percentage of news coverage devoted to each story, Pew Research Center's Project for Excellence in Journalism, July 4-10, 2011.

Journalism (PEJ). The debt debate accounted for 17% of coverage and the economy more generally 8%. The Anthony case made up 17% of coverage and Anthony was easily the week's top newsmaker. (See [*Deficit Deliberations and a Surprise Verdict Top the News.*](#))

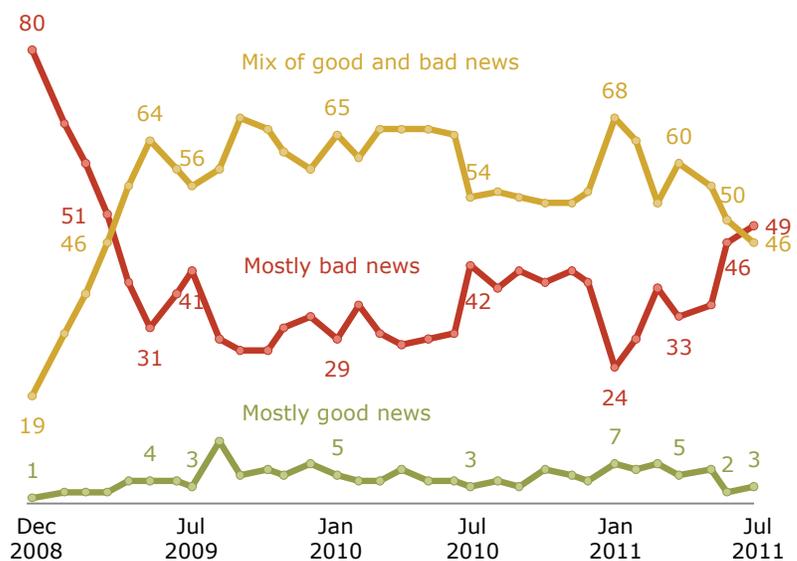

The murder trial also attracted considerable interest on social networking sites such as Facebook and Twitter. Two-thirds of those who use these sites say they heard a lot (40%) or a little (27%) about the Casey Anthony verdict from social networking, the highest percentage for any of the week's stories.

Amid continuing signs of a stalled recovery, the U.S. economy was also a popular topic on social networks; 17% of site users say they saw or heard a lot about the economy. Another 39% say they heard a little about this.

With the federal government releasing a worse than expected unemployment report on July 8, about half of the public (49%) says they are hearing mostly bad news about the economy. That is not much different from early June but up sharply from 35% in mid-May.

The balance of opinion on this is now comparable to where it was in March 2009. As many say they are hearing mostly bad news (49%) as say they are hearing a mix of good and bad news (46%) or mostly good economic news (3%).

Nearly Half Hearing Mostly Bad News About Economy

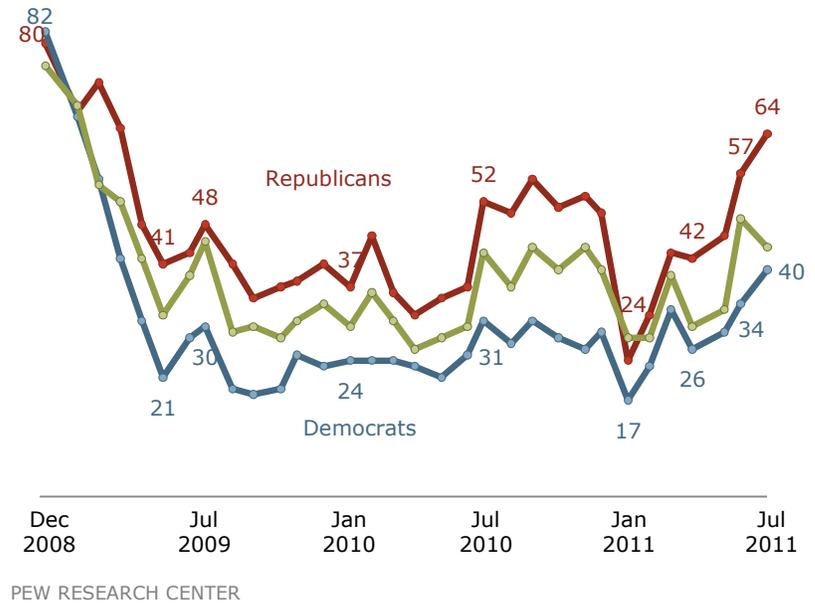

PEW RESEARCH CENTER

As overall perceptions of economic news have grown more negative, the partisan gap in perceptions has widened. In the new survey, 64% of Republicans say news about the economy is mostly bad, compared with 44% of independents and 40% of Democrats.

In January, when views of economic news were much less gloomy, the partisan differences were much smaller: 24% of Republicans, 17% of Democrats and 28% of independents said news about the economy was mostly bad.

Among Republicans and GOP-leaning independents, those who agree with the Tea Party movement are much more likely to say they are hearing mostly bad news about the economy than are those who disagree with the movement or have no opinion of it (74% vs. 49%).

A Widening Partisan Gap in Perceptions of Economic News

Hearing News on Social Network Sites

Overall, 46% of the public say they ever use Facebook, Twitter or other social networking sites. And most social networkers say they saw or heard at least a little last week on these sites about the verdict in the Casey Anthony trial (40% a lot, 27% a little). Nearly six-in-ten heard at least a little about economic news (17% a lot, 39% a little) and about half heard this much about the federal deficit and national debt (15% a lot, 33% a little).

Other stories drew less attention from social networkers. Only about four-in-ten social network users saw or heard at least a little about the 2012 election on Facebook, Twitter or other sites. About six-in-ten (61%) say they saw or heard nothing at all about the candidates. Even larger majorities heard nothing at all about the final space shuttle mission (69%) and developments in the case against Dominique Strauss-Kahn (80%) from social networking sites.

Casey Anthony Verdict a Major Topic for Social Networkers

<i>How much seen or heard about on social network sites...</i>	A lot	A little	Nothing at all	Don't know
	%	%	%	%
Casey Anthony	40	27	33	1=100
Economy	17	39	44	*=100
Deficit/Debt	15	33	52	*=100
2012 election	11	27	61	*=100
Shuttle mission	6	24	69	1=100
Strauss-Kahn case	4	13	80	2=100

PEW RESEARCH CENTER July 7-10, 2011. Figures may not add to 100% because of rounding
Based on those who say they use social networks such as Facebook and Twitter (46% of the total).

Coverage of Anthony Viewed as Fair

On balance, those who have an opinion of how news organizations have covered Casey Anthony and Dominique Strauss-Kahn see the coverage as fair. Most, though, offer no opinion about coverage of the allegations against the former IMF leader.

Few See Coverage of Casey Anthony as Unfair

<i>Have news organizations been fair in coverage of...</i>	Fair	Unfair	DK
	%	%	%
Casey Anthony	49	20	31=100
Dominique Strauss-Kahn	32	11	57=100

PEW RESEARCH CENTER July 7-10, 2011

About half (49%) say news organizations have been fair in their coverage of Anthony. Two-in-ten (20%) say the media has been unfair in coverage of the young woman. About three-in-ten (31%) offer no opinion. Men and women are about equally likely (51% of men, 48% of women) to say that news organizations have been fair in their coverage of Anthony.

With few following recent developments in the case against Strauss-Kahn, 57% offered no assessment of whether news organizations have covered him fairly. Still, by nearly three-to-one, more of those who have an opinion say coverage of Strauss-Kahn has been fair (32%) than unfair (11%).

The Week's News

Nearly four-in-ten (36%) say they followed news about the economy very closely last week, comparable to the level of interest in recent weeks; 17% say this was the news they followed most closely.

About three-in-ten (29%) say they followed news about the Anthony verdict very closely, though this was far and away the most closely followed story (37%). The number following the verdict very closely is comparable to the 30% that said they followed the verdict in the O.J. Simpson civil trial this closely in February 1997. Women are much more likely than men to say the Anthony verdict was the story they followed most closely (45% vs. 29%).

Another quarter (25%) say they followed news about the deficit and debt discussions in Washington very closely; 14% say this was the news they followed most closely. There is little difference in interest among partisans (30% of Republicans, 27% of Democrats and 23% of independents say they followed this news very closely). But within the ranks of

Republicans and Republican-leaning independents, those who agree with the Tea Party movement are much more likely than others to say they followed this news very closely (41% vs. 21%).

Other stories attracted far less attention. About one-in-six (16%) say they followed news about candidates for the 2012 presidential election very closely, while 4% say this was the news they followed most closely. The differences among partisans are small. Among Republicans and Republican-leaning, those who agree with the Tea Party are twice as likely as others to say they followed election news very closely (28% vs. 13%). News about the candidates accounted for 3% of coverage.

Fully 15% say they followed news about the launch of the final space shuttle mission very closely; 5% say this was their top story. News about the historic shuttle launch made up 5% of coverage. Just 6% say they very closely followed news about the sexual assault case against Dominique Strauss-Kahn, the former head of the International Monetary Fund. This was the story followed most closely by 1%. The Strauss-Kahn story made up 3% of the newshole.

News Interest

% following each story very closely

Which one story did you follow most closely?

PEW RESEARCH CENTER. July 7-10, 2011.

These findings are based on the most recent installment of the weekly News Interest Index, an ongoing project of the Pew Research Center for the People & the Press. The index, building on the Center's longstanding research into public attentiveness to major news stories, examines news interest as it relates to the news media's coverage. The weekly survey is conducted in conjunction with The Project for Excellence in Journalism's News Coverage Index, which monitors the news reported by major newspaper, television, radio and online news outlets on an ongoing basis. In the most recent week, data relating to news coverage were collected July 4-10, and survey data measuring public interest in the top news stories of the week were collected July 7-10 from a nationally representative sample of 1,007 adults.

About the News Interest Index

The *News Interest Index* is a weekly survey conducted by the Pew Research Center for the People & the Press aimed at gauging the public's interest in and reaction to major news events. This project has been undertaken in conjunction with the Project for Excellence in Journalism's *News Coverage Index*, an ongoing content analysis of the news. The News Coverage Index catalogues the news from top news organizations across five major sectors of the media: newspapers, network television, cable television, radio and the internet. Each week (from Monday through Sunday) PEJ compiles this data to identify the top stories for the week. (For more information about the Project for Excellence in Journalism's News Coverage Index, go to www.journalism.org.) The News Interest Index survey collects data from Thursday through Sunday to gauge public interest in the most covered stories of the week.

Results for this survey are based on telephone interviews conducted July 7-10, 2011, among a national sample of 1,007 adults 18 years of age or older living in the continental United States (674 respondents were interviewed on a landline telephone, and 333 were interviewed on a cell phone, including 126 who had no landline telephone). The survey was conducted by interviewers at Princeton Data Source under the direction of Princeton Survey Research Associates International. A combination of landline and cell phone random digit dial samples were used; both samples were provided by Survey Sampling International. Interviews were conducted in English. Respondents in the landline sample were selected by randomly asking for the youngest adult male or female who is now at home. Interviews in the cell sample were conducted with the person who answered the phone, if that person was an adult 18 years of age or older.

The combined landline and cell phone sample are weighted using an iterative technique that matches gender, age, education, race, Hispanic origin, region, and population density to parameters from the March 2010 Census Bureau's Current Population Survey. The sample is also weighted to match current patterns of telephone status based on extrapolations from the 2010 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size within the landline sample. Sampling errors and statistical tests of significance take into account the effect of weighting. The following table shows the sample sizes and the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey:

Group	Sample Size	Plus or minus ...
Total sample	1,007	4.0 percentage points
Republicans	266	7.5 percentage points
Democrats	325	7.0 percentage points
Independents	352	6.5 percentage points
<i>Among Republicans and Republican leaners:</i>		
Agree with Tea Party	196	8.5 percentage points
Disagree with Tea Party	193	8.5 percentage points

Sample sizes and sampling errors for other subgroups are available upon request.

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.
